Unsavory Potentates From India.

Great court is paid to the native Indian princes now in London, but owing to their domestic habits neither the Prince of Wales nor any of the society magnates who entertain that sort of people will invite them to stay at their houses. This has greatly increased the Indians, and they are being invited to return to India through Russia, where the Czar will be proud to treat them with every hospitality. The truth is that these Indian nabobs are only semi-civilized, and their notions of cleanliness and sanitation are not even that. The Maharajah has brought four regular wives with him from India, and fifteen irregular ones, and he has been adding to the number of the latter indiscriminately since he came to London, so that he has established a harem of large dimensions in the heart of sedate Kensington. It appears that all meat and poultry must be killed before his eyes, so the lower regions of the mansion have been turned into a shambles.

MATTERS IN HAWAII

Instructions From Gresham to Commissioner Blount.

A SEVERE BLOW TO THE LOYALISTS

Blount Now Appointed Envoy-Extraordinary.

He Accepted the Office With Reluctance—The Government of the Islands in a Good Financial Position—Monarchy Seems to be the Only Possible Form of Stable Government.

San Francisco, May 31.—The steamer Australia arrived this morning from Honolulu. She brings advices to May 24th. On the 25th inst. Commissioner Blount published in the form of a proclamation to the Hawaiian people the original instructions given him by Secretary Gresham. The following are extracts: "You will investigate and fully report to the President all the facts you can learn respecting the condition of affairs in the Hawaiian islands, the causes of the revolution by which the queen's government was overthrown, the sentiment of the people towards existing authority, and in general all you can enlighten the President touching upon the subject of your mission. Your authority in all matters touching the relations of this government to the existing or other government of the islands and protection of our citizens therein is paramount. You alone, acting in co operation with the commander of the naval forces, shall judge whether troops should be landed or withdrawn. While the United States claims no right to interfere in the political or domestic affairs, or the international conflicts of the Hawaiian islands, otherwise than as herein stated, or for the purposes of maintaining any treaty or other rights which they possess, this government will not acquiesce in domestic interference by other powers."

Blount appended the following to the instructions: "While I shall refrain from interference between conflicting forces of whatever nationality or supremacy, I will protect American citizens not participating in such a conflict."

This was especially intended by Blount as an unmistakable intimation to the Royalists that he would not employ United States forces to restore the Queen. They have been persistent in claiming that he might be expected to do so. This was to them a severe blow, as keeping up that fiction has been an essential part of their tactics.

On May 20th Blount received a telegram from Secretary Gresham announcing his appointment as envoy extraordinary and minister plenipotentiary to the Hawaiian islands, and directing him to take oath before the consul general. Blount expressed much reluctance to take office, doing so only to prevent a vacancy occurring at a critical period. He intends to occupy it only long enough for a successor to reach Honolulu.

Stevens turned the legation over to Blount on the 18th. Blount presented himself and was received by President Dole as United States minister on the 23rd.

The government is in a good financial condition. There is a strong disposition on the part of the capitalists to support the government as the only possible source of order and stability. In a recent interview Claus Spreckels said he believed an equally stable government could be secured without annexation. Without going into the details of such government, he set forth a species of oligarchy under Republican forms, retaining the present heads of the government, in whom he has the highest confidence. Should the United States fail to annex Hawaii it is evident that some such form of government would have to be instituted in order to secure any strength or stability whatever.

Retiring United States Minister Stevens paid his farewell visit to the provisional government on the 22nd. On the following evening the annexation club paid their farewell respects to Stevens at the Eagle House. The Hawaiian band was in attendance and firewroks were profusely displayed, and for half an hour citizens filed in and shook hands with the retiring minister.

On May 26th John E. Bush, editor of the Native Daily News, was arrested for criminal libel libel in charging the minister with selling government bonds at 15 per cent. below par.

Frank P. Hastings has been appointed secretary of the legation to the Hawaiian embassy at Washington.

T. C. Porter has resigned his office as Minister of Finance, and his successor will be S. M. Damon, vice-president of the provisional government, and manager of Bishop & Co.'s bank. This is a strong guarantee of the financial ability of the government.

On the evening of the 22nd inst. Chas. Nordhoff, correspondent of the New York Herald, was cited to appear before the council of the government to explain why he had published in the Herald a false charge that the majority of the members of the council had signed the lottery petitions, whereas the present members had not done so.

Minister Blount interposed his protection and notified President Dole that the United States did not permit its citizens abroad to be called to account for libels published in another country, citing the case of Cumming in Mexico. Nordhoff had also been served on the 23rd under threat of prosecution for libel, with a demand for an apology for having slandered the president in the Herald, to the effect that President Dole and Minister Stevens had quite recently combined to extort from the ex-queen a formal abdication of the throne.

Another newspaper man, editor of a native paper, G. G. Kenyon, has been arrested for criminal libel in having charged U. S. Minister Stevens with piracy and robbery. Kenyon's article accused Stevens of attempting to steal the islands and characterized the action of raising the United States flag as "that of a band of buccaneers, regardless alike of order, law or delicacy."

Found in an Unclaimed Bag.

Montreal, Que., May 31.—Lee Stanton, a painter, came to Montreal from England two months ago. Last Wednesday at a Grand Trunk Railway sale of unclaimed baggage, he bought a locked leather valise for $2. On opening it to-day, he found a new suit of clothes, fine linen and 107 shares in the Western Gas Improving Company of Clarkson street, Chicago; fully paid up and of a cash value of $107,000. Also letters patent for 17 years to manufacture in the United States patent carburettors. The owner of the valise, as proved by letters and the shares, was Louis Halberstadt, and as he has evidently mysteriously disappeared from Montreal, detectives are working on the case. Stanton telegraphed to Chicago this afternoon. He received a reply stating that the company is a German one doing an extensive business, but owing to the holidays no officials could be communicated with.

Increasing Wrecking Privileges.

Ottawa, Ont., May 31.—A proclamation putting in force from June 1 the act of 1892 granting American wreckers the right to operate in Canadian waters contiguous to the United States has been published in the Canada Gazette. On the same day the United States act, granting similar privileges to Canadian wreckers, will be brought into force by a proclamation of the President. In the future Canadians can employ labor and machinery free of duty in rescuing and restoring wrecked vessel property.

NICARAGUA'S CRISIS.

Sacaza's Deputies Cannot Arrange Peace With the Insurgents.

Granada, Nicaragua, May 31.—The conference held in Sabrina Grande yesterday between the representatives of President Sacaza and the revolutionists was somewhat disappointing.

Three peace commissioners appointed by President Sacaza met the three representatives of the insurgents at noon yesterday. Those representing the insurgents returned to Granada last night. They declined to make public the various propositions advanced by each side, but report that no agreement was reached. Another conference was held today, but it is not believed that an arrangement for ending the war can be reached. It is probable that hostilities will be resumed at the end of 48 hours, during which it was agreed that the truce should prevail. It is rumored that the Sacaza representatives asked greater concessions than the insurgents would grant. The revolutionists appear determined that no arrangements shall be made short of the complete overthrow of Sacaza's government.

It is reported here that many prominent citizens of Leon, who sympathize with the revolutionists, have been imprisoned by order of President Sacaza. General Urtecho, ex-commander of the government troops, is one of those who have been thrown into the dungeon.

CANADA'S CAPITAL.

Abolition of Ancient Holidays by Act of Parliament.

Ottawa, May 31.—To-morrow is the feast of Corpus Christi; for the first time it will not be observed in the departments as a public holiday. This is the result of the act passed last session abolishing Corpus Christi, Annunciation and St. Paul and St. Peter days as statutory holidays.

DOMINION DAY DEFICIT.

Caution to be Used This Year—The Haytien Republic's Business.

Vancouver, May 31.—The accounts of last year's Dominion Day celebration show a deficit of $479. Committees were appointed last night to prepare the celebration this year, but there will be only one day's sports.

The board of trade and city council will attend to the demonstration upon the arrival of the first Australian steamer, the Miowera.

A gentleman here who is connected with the Haytien Republic says that $7,000 worth of opium and 174 contraband Chinamen have been taken across to the States by that steamer since December last.

Another batch of vagrants was run out of the city to-day.

THE LUMBY RANCH SOLD.

It is Purchased From Major Dupont by Sir Arthur Campbell Stepney.

Major C. T. Dupont of this city has sold his property in the Okanagan district, known as the Lumby ranch, to Sir Arthur Campbell Stepney. The ranch comprises over 1,300 acres and is situated near Enderby, in the heart of one of the best wheat growing countries on the continent. Most of the property has been under cultivation for many years and immense crops of wheat have been raised on it. Before the construction of the Shuswap & Okanagan railway it was a difficult matter to dispose of the wheat, but now the road is in operation and the wheat that cannot be used at the Enderby mill can be easily shipped.

It is understood that the price paid was in the neighborhood of $50,000. Sir Arthur had for some time been negotiating for a ranch in British Columbia on which to make his home.

TOKENS OF ESTEEM.

Departure of Rev. Baer Regretted—Active Work at the Mines.

Nanaimo, May 31.—Rev. W. W. Baer and wife left for Victoria this morning, where they will spend a few days before leaving for their new field of labor at Vancouver. The Methodists of this city presented him with an address and a well-filled purse. Mr. Baer replied, after which there was a general handshaking, followed by a repast of ice cream and cakes. A large number of friends witnessed the departure this morning.

The site for the new jail is to be just beyond the city limits on Wentworth street. Nine acres have been secured from the New V. C. Co.

Coal is being shipped very rapidly by the new V. C. Co. at present. The new shaft on Protection island contributes 500 tons daily, and as there is a separate wharf there is is promptly despatched. Both seams are being worked at present from this shaft, but in another month it will be connected with No. 3 of the Esplanade shaft, when the motors will probably bring the coal from the top seam to the Esplanade shaft.

A provincial policeman recently broke into the house of a citizen under the plea that he thought a klootchman was within. It is said that if the constable's zeal leads him into another such mistake the result will be different.

The Nanaimo cricket club has accepted the challenge of the Courtney Athletic Club and the match will take place at an early date.

Severe Punishment Promised.

Panama, Colombia, May 31.—The Colombian government has been notified by the Venezuelan minister of foreign affairs that all persons connected with the outrage upon Colombian residents of Tachora will be severely punished.

OWNERSHIP OF SEALS

Sir Chas. Russell's Idea of the American Claim.

IT IS UNPRECEDENTED IN HISTORY

The Law in Regard to Seizing Vessels of a Friendly Power.

Objects of International Legal Rules—The Present Tribunal Cannot Make Law—Sir Charles Concludes With a Peroration on the Significance of the Present Arbitration.

Paris, May 31.—Sir Charles Russell continued his argument before the Behring Sea tribunal of arbitration at 50 minutes past 12 to-day. He said this was the first occasion upon which a nation has claimed property in a free swimming animal. The contention, Sir Charles declared, was untenable and its advancement was derogatory to the principle of the freedom of the seas.

Sir Charles, continuing, said it was an extravagant and unfounded pretension that international law sanctioned the seizure and condemnation of vessels of a friendly power. Existing international laws were effective monuments to serve the just purposes of mankind in the adjudication of their rights. Sir Charles appealed to the tribunal to declare that it could not make law. Sir Charles in his peroration dwelt upon the importance of the present arbitration here submitted by the two great powers, one representing old world civilization; great in extent of dominion, and greater in long-enduring traditions of liberty. The other was a young but stalwart member of the family of nations; great also in territory and almost boundless in resources, and in the genius and enterprise of its people possessing enormous powers for good in the future of the human race. Their presence as friendly litigants is a fact of great moral significance, and their submission to arbitration is a victory for peace, as whatever the award may be, it leaves the principles of international law untouched.

At the close of Sir Charles' address, the president of the court, Baron de Courcelles, spoke in complimentary language of the ability and eloquence which Sir Charles had displayed in his protracted argument.

Ex-Attorney-General Sir Richard Webster followed Sir Charles on behalf of the British case. Sir Richard insisted that questions of rights and regulations were distinctly demarcated by treaty.

Sued for Accumulated Royalty.

Indianapolis, Ind., May 31.—Congressman Charles G. Conn, of the thirteenth Indiana, has been made defendant in a suit filed in the federal court in, which $75,0000 damages are demanded. The defendants are Eugene Vanderbash of Chicago and Marie Wirtz of Philadelphia, who claim to be the legal heirs of Eugene Dupont, who was formerly a partner of Conn in the horn business. It is alleged that when the partnership was dissolved Conn agreed to pay to Dupont a royalty on a patent valve, and that the accumulated royalties amount to the sum demanded in the complaint. Conn is the proprietor of an immense horn factory at Elkhart.

Killed by His Workmen.

Saltillos, Mexico, May 31.—C. W. Langtry, a prominent mining man, arrived here this morning from the Cerralvo mining camp in the state of Nueva Leon, bringing news of the assassination of Melchion Calderon, a mining engineer known throughout Mexico, by the miners in his employ. Senor Calderon recently discharged a Mexican miner named Borcario, and the latter organized the plot to kill him. Borcario worked up a feeling among the miners against Calderon and they attacked the engineer at his home, filling his body with bullets. A number of arrests have been ordered.

Mexico on the Hog Question.

City of Mexico, May 31.—A decree that will prove of great interest to the slaughtering establishments of Kansas City and Chicago and St. Louis has just been issued by President Diaz. The decree peremptorily forbids the shipment of slaughtered hogs into the City of Mexico. Hereafter all hogs for consumption must be brought in alive. This action was taken in view of the fact that in cases of alleged fresh pork shipped here from the United States and from points in Mexico it is not always possible to decide whether or not the animal died of some disease or was in a healthy condition when slaughtered.

General American Dispatches.

Buffalo, N. Y., May 31.—The remains of George Leman, of Buffalo, and Geo. York, of Clarence, aged, respectively, 18 and 22, were found at the West Shore crossing near the village of Akron this morning, both terribly mangled. Investigation showed they attempted to cross the track in a vehicle in front of a moving train. The wagon was demolished, but the horse escaped uninjured.

Philadelphia, Pa., May 31.—Ex-State Senator John J. Macfarlane, the defaulting president of the United American Life Insurance Company, and wrecker of the Bank of America, with which he was also connected, surrendered himself to the authorities this morning, and in court of quarter sessions pleaded guilty to the indictments against him and was sentenced by Judge Hare to four years in prison.

Visalia, Cal., May 31.—Detective Black, who was wounded by Sontag and Evans, continues to improve. He is now said to be entirely out of danger unless blood poisoning intervenes.

The Canary Market.

For more than a century the breeding of canaries has been a thriving industry in parts of Germany. In 1850 the German dealers began to ship the birds to New York, and then to South America and Australia. The profits are small, but the industry is a godsend to the poor, who make the small wooden cages. It is estimated that about 250,000 canary birds are raised every year in Germany. The most important market is the United States, which takes about 100,000 birds per annum. When the birds are shipped to this country they are always accompanied by an attendant. On the return voyage these attendants take American birds and animals to Europe.

JEFFERSON DAVIS.

The Remains of the Confederate Chief Consigned to Their Resting Place.

Richmond, Va., May 31.—In the presence of an immense multitude, representing every state in the South, and many northern visitors, the remains of the late Jefferson Davis, the first and last president of the confederacy, were interred to-day in Hollywood cemetery. By public proclamation the day was observed as a general holiday.

The early morning trains were loaded with additions to the throng already in the city, among them being many companies and camps of the United Confederate Veterans from different parts of the state. The town itself was in funeral garb. The stars and stripes fluttered over hundreds of buildings and housetops, public and private, and in the windows of the business district there was a general display of pictures of the statesman, bordered and festooned with crape.

All night a continuous procession passed through the rotunda of the capitol, where the casket, surrounded by the guard of honor, rested in state, and when day broke the crowd outside awaiting entrance was as large as it had been at any time since the arrival of the remains. As early as 7 o'clock tributes of sweet smelling flowers commenced to arrive. They were of all conceivable shapes and designs known to the florist. Some came in wagons, others were carried or were brought in carriages by those presenting them, and inside of an hour the ground surrounding the casket for a space of several feet was piled high with remembrances of the departed and the air was filled with perfume.

At 9 o'clock the pupils of the public schools of the city, who in the meantime had been organizing at their respective school houses, marched in procession to the capital. Each child carried a garland of flowers, and these were placed on the bier as the little ones marched around in single file. The procession for the cemetery started shortly after noon. It was composed of state troops, camps of the United Confederate Veterans, municipal bodies, delegations from other states and cities of the south, and citizens generally. When the first division had passed the capitol building there was a halt and the funeral division passed into line. The caisson on which the casket rested was draped with flags and ornamented with shields and swords and was drawn by eight caparisoned black horses, each led by a soldier.

A carriage occupied by Mrs. Davis, Miss Winnie Davis, Mr. Davis' married daughter, Mrs. J. A. Haynes, and Mayor Ellyson, president of the Jefferson monument association, immediately followed the caisson. In other vehicles were ladies of the Hollywood, Oakwood and Hebrew memorial associations, and the governors of several states. In the next division were over 1,000 cavalrymen, members of the directory of the Jefferson Davis monument association, and veterans in carriages, on horseback and afoot. The Lee camp of veterans turned out in larger numbers than ever since the surrender in 1865, with the possible exception of the unveiling of the Lee monument. Gen. John B. Gordon of Georgia was chief marshal of the procession, with Col. John B. Carey of Virginia as chief of staff. All along the line of march, which was through the principal streets, the sidewalks, steps and windows were packed with people. Every house was draped in emblems of mourning.

It was nearly 3 o'clock when Hollywood cemetery was reached. Some little delay was occasioned in placing the different organizations in the positions assigned to them. A low platform had been erected, and upon this the members of the Davis family and the distinguished guests were seated. The exercises were brief and impressive. There was no oration or address. When everything was in readiness the exercises opened with a funeral dirge, especially composed for the occasion by Prof. Joseph Reinhardt of this city, and rendered by a band of 50 pieces. A selection from the New Testament was read by Bishop Hugh Miller Thompson of Mississippi, and then the vast audience united in singing the hymn, "How Firm a Foundation." The Rev. Dr. Moses D. Hoge, pastor of the Second Presbyterian church of this city, then led in prayer. He repeated the Lord's prayer.

Hardly had the echoes of the thousands of fervent amens died away when eight veterans stepped to the edge of the grave and gently lowered the casket into the grave. Every head was bared, and although thousands upon thousands could not look upon the last act, the most intense silence was preserved. When the veterans had fulfilled their task Rev. Dr. Osbarton, rector of Old Christ church of Norfolk, Va., who became warmly attached to Mr. Davis while the latter was in prison at Fortress Monroe, pronounced the benediction. This concluded the exercises, and the procession reformed and returned to the city.

The spot where the remains of the famous confederate chieftain were laid to rest to-day is near the tombs of two presidents of the United States, James Monroe and John Tyler. Near by are the graves of John Randolph, of Roanoke; J. A. Seadon, who was the secretary of the confederate navy; ex-Gov. Henry A. Wise; John Thompson, the poet; the confederate cavalry commander, J. E. B. Stuart, and Generals Pickett, Pegram, John R. Cooke and William Smith. Here also lie 12,000 confederate soldiers, who lost their lives at Gettysburg, Cold Harbor, and the seven days' battle around Richmond and other sanguinary conflicts of the late war.

The Davis circle is a commanding spot on a bluff overlooking the James river. It is within sight of the little mound marking the grave of little Joe, Mr. Davis' son, who was killed during the war by falling from the rear balcony of the confederate executive mansion. The white slab at the head of the little one's grave was erected by his child friends, and both the body and the slab were yesterday moved alongside the grave of the father, which was opened and finally closed this afternoon. The grave of Jefferson Davis will be marked by a simple stone, as the monument to be erected to him will be in Monroe Park in the most fashionable residence section of Richmond. No design for the memorial has yet been decided upon, but sentiment among the leaders in the monument association favors a shrine after the design of a Greek temple, containing a recumbent figure, and with the principal events in the history of the confederacy recorded in a bas relief frieze.

Depends on the Harvest.

Berlin, May 30.—Herr Siemens, manager of the Deutsche bank, said in an interview, that future financial relations between Germany and the United States depend upon the German harvest and the fate of the Sherman bill. If drouth continued another fortnight Germany must buy wheat and rye in Hungary, Bulgaria and the United States at sellers' prices; that small private capitalists in Germany have been frightened by the unsettled state of the American market and have withdrawn their orders for American securities. Nevertheless, they are hungry for such securities, and the instant the silver question is settled they will again invest in them.

THE EUROPEAN CRISIS.

German Politics the Disturbing Factor—What Leo Said to Wilhelm.

Paris, May 30.—The European situation continues to be dominated by German politics, and the efforts made by the Emperor and the Empire show how grave the conditions are. Many other indications increase this impression, especially in Catholic diplomacy. The different nuncios of the Pope are all restless, as if some of the restlessness came from Rome. The nuncios relate that the Emperor William told that he was determined to make war, as France was a danger to European monarchies. She does not accept the situation brought about by the events of 1870, therefore war is inevitable, consequently it would be better to make war now in order to diminish as rapidly as possible the burdens weighing upon the people.

The Pope, in relating this interview, is said to have remarked: "I pleaded with him, I wept with him." One proof of the truth of these reports is that since the interview with the Emperor the Pope has had mass said daily to turn away the threatening evils. With such symptoms it can be understood that the tone of international politics is not rose colored.

Another political factor is the ever increasing friction between France and Great Britain. Every question between the two countries takes a bitter aspect, especially in the colonial affairs of Madagascar and Siam, where France has a great deal to trouble her just now. Since it has been proved that the natives received ammunition and arms from Great Britain it will be readily understood that the French government is not very well satisfied with such proceedings, which are habitual in British politics.

As to internal affairs, France is making ready for the elections. All reports coming from the provinces show that the Panama scandals have produced no effect upon the public mind. The election will go Republican and the composition of the next Chamber of Deputies will be very much like the present one. Perhaps the Conservative party will lose 50 seats to the "remained," as they are called. That is, the Monarchists, who have become Republicans. There is reason to believe that the Socialist party will gain 20 seats, especially in the south. After the elections it is probable that President Carnot will call on M. Constans to form a ministry, which may have a chance of lasting two years and may give to France the much needed stability of government.

Austrian Discipline.

Vienna, May 30.—While inspecting a crack Austrian regiment of hussars, on the parade ground of the main barracks, Colonel Smzesanyi was yesterday angered by the clumsiness of a non-commissioned officer. He called the officer to him and, with an oath, gave him a box on the ear. Upon his return, blushing and weeping, to his men, the officer took a carbine and shot himself in the head. He died on the parade grounds. The affair has caused tremendous excitement throughout the garrison. It is reported this evening that the Emperor has ordered the arrest of Colonel Smzesanyi, pending his trial by court martial.

GENERAL DISPATCHES.

News in Brief From Various Parts of the World.

Berlin, May 30.—Hon. Theodore Runyon, American minister to Germany, was officially received at the foreign office at noon to-day. Hon. William Walter Phelps, late American minister, bade his official farewell at the same time. The wedding of his daughter to Dr. Franzo Venrottenburgh, under secretary of the interior, will take place on Thursday.

Copenhagen, May 30.—A meeting attended by 135 delegates at Aarhuus, in Denmark, has promulgated a manifesto protesting against German rule in Schleswig. The meeting was attended by great enthusiasm, and showed that the feeling of attachment to Denmark is still very strong in the province which was taken from her by Prussia.

Vienna, May 30.—A dispatch from Prague says that a mob of students on Sunday attacked the house of the rector Prof. Prazak, smashed the windows and tried to break in the doors. The students fought the police, who were summoned to drive them off. Twenty arrests have been made.

St. Petersburg, May 30.—The Czar and Czarina, grand dukes and grand duchesses, and the chief officials of the city government attended service on Sunday at the cathedral of the Assumption in the Kremlin. At the top of the famous red staircase they bowed to the multitude. Deafening cheers went up from the people. Bells were rung and salutes fired. Moscow is decorated and illuminated this evening. In St. Petersburg all members of the imperial family not in Moscow and officials of state worshipped at St. Isaac's cathedral. After service the artillery fired repeated salutes. This evening the fortresses were illuminated and decorated.

London, May 30.—The grand jury has found a true bill against William Townsend, the individual arrested recently on a charge of having discharged a pistol in Downing street, but really on suspicion of intending to kill Mr. Gladstone, and he was also held on the additional charge of sending a threatening letter to Mr. Gladstone. Townsend will be tried at the Old Bailey, probably on Thursday next.

Changes at Stanford University.

San Francisco, May 30.—According to a very strong rumor this afternoon, David Starr has resigned the presidency of the Leland Stanford, jr., University. The resignation is said to have been made to Senator Stanford personally, and supplemented by a written resignation, which the founder of the institution has accepted. To-morrow will be commencement day at the Pala Alto college. It is understood that with the end of the scholastic year President Jordan's connection with the college will cease. The reason given for the resignation is that Senator Stanford has for some time been rather dissatisfied with the manner in which Jordan has managed the university affairs. When he returned from abroad about six weeks ago he summoned the president to a conference at his residence, and indicated the change he desired, but Jordan resented interference with the ultimate results as stated.

GERMAN TORY BILL.

Deputies Who Voted Against the Measure Publicly Commended.

Berlin, May 30.—The Rheinel and Clerical parties have published an election manifesto, which commends their deputies for voting against the army bill, and declares that the growth of the army budget renders impossible any advance in the way of social reform. Nevertheless, the Rheinel and Clerical parties profess a willingness to grant as much of the government demand as is indispensable to the security of the empire.

The Catholic Poles of West Prussia have decided to leave their candidates unfettered by pledges as to their attitude toward the army bill. They have resolved, however, to form a national Polish union to agitate against the needless increase of oppressive taxation.

Dr. Alexander Meyer, Radical deputy in the last Reichstag for the First Berlin district, in addressing a Radical meeting in Halle this evening, blamed the government for not having conferred in advance with the parties as to the additional taxation contemplated in the army bill. The failure of the government to do this should not be regarded, he says, in any way as affecting the merits of the bill. After mature consideration he had become convinced that an increase of the army was necessary, and, therefore, he favored the Huene compromise.

Eugene Richter is contesting the Fourth and Sixth electoral districts of Berlin against the Social Democrats. Krupp, of Essen, is contesting Essen against a Socialist and Clerical. The Emperor has ordered that all the shops be closed on June 15th, election day, as well as on the day of the second ballots.

Directions for Colic in Horses.

Contents of small bottle of Pain-Killer in quart bottle, add pint warm or cold water, sweeten with molasses, shake well until all mixed, and drench well. Give about half at once, then balance in ten or fifteen minutes, if first dose is not sufficient. This will be found a never-failing remedy. 25c. for a large bottle.

VALUABLE ESTATE

For Sale or Exchange for City Property.

In consequence of sickness the owner has decided to sell the ranch known as Stroebel's Addition to the cities of Huntingdon and Sumas, an investment seldom offered; location good. One hundred acres of good bottom and prairie land, well ditched and improved; Farm House, Outbuildings, etc. This property is sure to become in the near future valuable town property, independent of being good farming land. It is at present a railway centre. The Canadian Pacific Railway Company purchased a piece of the above described quarter section for their station; and also for the proposed Chilliwack Railway coming in on this property, which will add one more to the many railways already there. The adjoining property constitutes the cities of Huntingdon and Sumas, where there is a population of 1000 people. The B.B. and B.C. Railway Company and the Northern Pacific Railway Company's stations are some two hundred yards from the land now offered for sale. The B.I. and F.V. Railway Company's station will be erected a few yards from this property, if not on it. Fifty acres ready for the plough. Part of it already in crop. The above is a good opening for anyone wishing to commence in the milk or dairy business. The buyer would have the privilege of running a large number of cattle over six thousand acres of unfenced prairie land adjoining the above place. This land is well adapted for hop raising, and will grow hay at the rate of four tons to the acre, which can be shipped into Vancouver by the B.I. and F.V. Railway or the Canadian Pacific at a moderate rate. The above place will be sold cheap. Possession can be given at any time. Terms will be made liberal and made to suit the purchaser. A large percentage of the purchase consideration will be allowed to remain on mortgage security at current rate of interest. Further particulars on application to undersigned. Apply to

JOHN MESTON

CARRIAGE MAKER

BLACKSMITH, ETC.

Broad street, between Johnson and Pandora streets.

VICTORIA, B. C

A BY-LAW

WHEREAS it is expedient to raise a sum of money to provide for the construction of certain main surface drains in the city of Victoria as follows:

Work Estate,

View street and branches,

Spring Ridge and Fernwood road,

Cook street and branches,

Michigan and Superior streets,

Oswego street,

Menzies street,

North and South Pandora streets,

Victoria West,

And other necessary drains not specified.

AND WHEREAS the estimated cost of such works is $125,000.

AND WHEREAS for the purpose aforesaid it is intended to raise by way of loan upon the credit of the city the sum of $125,000.

AND WHEREAS it will require the sum of $8,125 to be raised annually by special rate for the payment of the said debt and interest hereinafter mentioned.

AND WHEREAS the amount of the whole rateable property of the corporation of the city of Victoria according to the last revised assessment roll, being for the year 1892, was $18,749,125.

AND WHEREAS it will require an annual special rate of four-fifths of one mill in the dollar for the payment of the interest and for creating an equal yearly sinking fund for paying the principal of the said new debt according to the Municipal Act, 1892.

AND WHEREAS it is intended to reduce the general rate so that the said special rate shall not increase the total rate of taxation.

Be it therefore enacted by the Council of the Corporation of the City of Victoria as follows:

Sec. 1. It shall be lawful for the Mayor of the Corporation of the City of Victoria to borrow upon the credit of the said Corporation by way of debentures hereinafter mentioned, from any person or persons or body or bodies corporate who may be willing to advance the same as a loan, a sum of money not exceeding in the whole the sum of $125,000 00 currency, and to cause all such sums so raised or received to be paid into the hands of the treasurer of the said corporation for the purpose and with the object hereinbefore recited.

Sec. 2. It shall be lawful for the said Mayor to cause any number of debentures to be made for such sums as may be required, not exceeding, however, the sum of $125,000 00 in currency, each of the said debentures being of the amount of $1,000, and all such debentures shall be sealed with the seal of the said corporation and signed by the Mayor thereof.

Sec. 3. The said debentures shall be made payable in fifty years from the date hereinafter mentioned for this by-law to take effect, at the office of the treasurer of the said corporation, in the City Hall, Victoria, and shall have attached to them coupons for the payment of interest, and the signature of the Mayor and of the Clerk of the Corporation respectively to the coupons may be affixed by printed, stamped or lithographed fac simile.

Sec. 4. The said debentures shall bear interest at the rate of 4 1-2 per cent. per annum from the date thereof, which interest shall be payable half yearly at the office of the said treasurer.

Sec. 5. For the purpose of forming a sinking fund for the payment of the said debentures and the interest to become due thereon an equal special rate of four-fifths of one mill in the dollar shall in addition to all other rates be levied and collected in each year upon all rateable property within the city of Victoria during the continuance of the said debentures or any of them.

Sec. 6. In case of any conflict, inconsistency or repugnancy between the provisions of this by-law and any of the provisions of the Local Improvement By-law, 1892, as amended by By-law No. 178, entitled, "A By-law to amend the Local Improvement By-law, 1892," the provisions of this by-law shall prevail and override any of the provisions of such Local Improvement By-law to the extent of any such conflict, inconsistency or repugnancy, but this by-law shall not be deemed to in any wise repeal, alter or amend such Local Improvement By-law and amendment, except in so far as this by-law is concerned, and then so far only as is necessary to give full force and effect to this by-law.

Sec. 7. This by-law shall before the passage thereof receive the assent of the electors of the said corporation in a manner provided for by the Municipal Act, 1892, or any amendment thereto, and shall take effect on the first day of May, 1893.

Sec. 8. This by-law may be cited as "The Surface Drains By-law, 1893."

Passed the Municipal Council this 27th day of March, 1893.

Received the assent of and confirmed by the municipal electors on the 18th day of April, 1893.

Reconsidered, adopted, and finally passed by the municipal council on the 19th day of April, 1893.

(Sd) ROBERT BEAVEN, Mayor.

WELLINGTON J. DOWLER, C.M.C.

NOTICE.

The above is a true copy of a by-law passed by the Municipal Council of the City of Victoria, on the 19th day of April, A.D. 1893, and all persons are hereby required to take notice that anyone desirous of applying to have such by-law or any part thereof quashed must make his application for that purpose to the Supreme Court within one month next after the publication of this by-law in the British Columbia Gazette, or he will be too late to be heard in that behalf.

BRITISH PARLIAMENT.

A Question of Removing Flags—Home Rule Bill Open to Modification.

London, May 30.—In the House of Commons to-day the Liberal-Unionist members for South Londonderry asked whether the government had ordered the removal of Union Jacks from the hotels at Belfast. Chief Secretary Morley replied that he need hardly say that the executive had not ordered the removal of the flags. The laws had been amended so that the police could enter licensed premises and remove or, if necessary, destroy any emblems displayed there and likely, in the opinion of the police, to tend to a breach of the peace.

Mr. W. Saunders, Liberal M.P., Walworth, who had talked of voting against the second reading of the Irish Home Rule bill on the ground that it perpetuated the property qualification, asked whether the government adhered to the property qualification for the electors of the second chamber of the Irish legislature.

Prime Minister Gladstone replied that the government had laid the proposal frankly before the House. He had never said the scheme was stereotyped and unalterable. It would be open to modification in accordance with the views expressed by the House.

The House, by a vote of 273 to 240, rejected a motion to postpone discussion on clause 3 of the Irish Home Rule bill, dealing with and defining the powers of the Irish legislature.

By a vote of 281 to 197, the House refused to adjourn over to-morrow in order to enable the members to attend the Derby at Epsom.

CALIFORNIA'S CAPITAL.

Alaskan Steamer Trips—The Chinese Question—Minister Stevens Returns.

San Francisco, May 30.—The steamer Mexico will make an extra trip from this city to Juneau, Alaska, leaving on Friday next. She will carry freight. The trip has been made necessary by reason of the fact that the Alaska steamers on the route are running on close time, making two trips per month, and have been unable to carry the freight offered. The Queen will leave here on June 1 for Alaska and continue on the Alaska route during the summer months. The State of California will be ready to resume her run on the Portland route on June 5.

United States Commissioner Sawyer was seen to-day and stated that he was not positive that the cases of the seven Chinese who were smuggled into the country from Victoria, B. C., would be heard to-morrow. "I am ready at any time to settle this matter," said he, "but, of course, I am unable to say what order I shall make. Everything will depend upon the case that the government makes out. If the Chinese are illegally in this country, they will probably be deported." Collector Phelps is positive that he can show that the seven Chinamen have no right to remain here.

John L. Stevens, ex-minister of the United States to Hawaii, will arrive on the steamer Australia to-morrow. He has prepared an address to the American people in which he defends his course as foreign minister resident, in raising the American flag over the public buildings of a friendly government. He told the correspondents in Honolulu that he would make the letter public immediately on his arrival in this city.

Praise for Slocan.

Lake Wolfard, who has just returned from the Slocan country, in British Columbia, tells the Colfax Commoner: "In spite of the fact that it is a newly-opened region, the chances for transportation are par excellence. From Kaslo, one may take a boat over Dead Water lake and river to Bonner's Ferry, and thence by way of the Great Northern to Spokane.

"The development has not been pushed far enough as yet to prove that these mines have any great depth, and probably 250 feet is the lowest depth yet reached in the Slocan. So far as they have gone, however, the mines tend to grow better both as to grade and size of ore body. As to the surface showing it is a common remark among old mining prospectors that the Slocan country makes a richer showing for silver than has ever been known in the United States or British Columbia. So great, in fact, is this surface showing, that extensive mining will be done and a large output returned from what is in sight.

"The grade of the ore is the catching feature of the Slocan country. I have heard of only two or three properties in the camp where the grade of ore has run below 100 ounces to the ton. The Washington mine, Mountain Chief, Jackson, Freddie Lee, Bluebird, Noble Five group, Grady group and Alamo have already shown extensive ore bodies, which run from 120 to 250 ounces to the ton, with 50 to 80 per cent. in lead.

"When we consider that in the Coeur d'Alene district, the average grade of silver-galena ores does not exceed 25 ounces per ton, the possibilities of the Slocan region are almost beyond computation. Besides those I have mentioned there are properties like the Dardanelles, Big Bertha and others, which run as high as 400 to 600 ounces per ton.

"Indeed, the most suspicious feature of the camp is the phenomenal high quality of its ores, raising a natural doubt in the practical mind as to their permanency. Swarms of prospectors are already making their way into that country; but it will be about 60 days before they can prospect to any advantage, as the higher ranges are now covered with snow to a depth of from seven to ten feet."

English and American Farming.

The New York Homestead says: "English agricultural circles are much troubled over the decline in their farming industry. It seems remarkable that in that fertile country, where the people have to import two-thirds of their food, farming cannot be made to pay. In the growth of cereals they have had to compete with our large area of virgin soil needing no fertilizer. Another disadvantage under which the English farmer labors is that he generally has to pay a high rent, and is often forced, according to the terms of his lease, to farm according to defined rules so as to keep the land in good condition, whether the result pays him or not. In America, on the other hand, farmers as a general thing own their own farms, have no rent to pay, though there may be interest on mortgages, and can work the land as they please. English farmers are becoming more inclined to abandon cereal crops in favor of dairy farming. The average yield of the English dairy cow is 400 gallons of milk yearly, while our farmers try to average 800 gallons from each cow. England has less than 3,500,000 cows, while we have four times that number. Besides the high rents the British farmers lose through lack of co-operation. While the American farmer may have his mortgage, his milk and cream are worked up by the co-operative associations and his net returns are larger. Here the American farmer and his family do the work; in England the farmer is generally a gentleman farmer and hires all his help. When the English farmer learns to take off his coat and get down to solid work he may find that his receipts every year do not fall so short of his expenditures."

IF YOU WANT TO TRAVEL

through life by the rough stages of coughs, colds and consumption, be careless of yourself during the damp, cold weather and DON'T use

Allen's Lung Balsam

for that nasty cough of yours. But if you'd like to live to a green old age in health, and consequently in happiness, use

Allen's Lung Balsam

as a preventive and cure of all Throat and Lung diseases.

—PRICES—

25c, 50c & $1.00 Per Bottle.

Soothed by Music.

According to one of the New York dailies, a bright boy of 16 years has for a year or more distracted his mother from murderous designs by playing the harmonica. Barbara Steiner, whose husband is an inmate of Ward's insane asylum, supported her four children for two years by working in a cigar factory. A year ago the task became too severe and her mind gave way. Since then the boy's wages have been the sole dependence of the family. Of late the mother has possessed the idea that her little children have designs upon her life. The boy feared for their safety and was puzzled how to prevent his mother from executing in his absence any evil purpose she might have. He one day remembered his mother was passionately fond of music, and would sit quietly for hours while he played the harmonica. When he was at home she would urge him to play and promise anything he asked in return. So every morning after this the lad would fix his mother comfortably for the day and secure from her the promise to be quiet all day and take good care of the little ones, in return for which he would promise to play for her when he came home. He always, however, took the precaution to remove the hatchet, saw and everything that would possibly invite sanguinary thoughts in his mother's mind to some hiding place. The neighbors a day or two ago heard of the state of affairs and reported the matter to the police. The woman is now in Bellevue hospital, while the three young children have been committed to the care of the Association for Befriending Young Girls.

Photo-Printing.

The so-called "simplicimus" process of printing, due to Mr. Einsle, consists of taking a sheet of paper—whether ordinary printing paper, drawing paper, or writing paper—pinning it down on a drawing board, and applying an even layer of the following by means of a sponge: Common salt two parts, arrowroot three parts, water 100 parts. We need scarcely say that the arrowroot must be softened or converted into paste in the usual way. When the paper is dry it is once more pinned on the drawing board, and sensitized of one part of silver nitrate in five parts of water, a strip of sponge being used; but in this case the sponge should be held in a light wooden clamp, such as may readily be constructed of two pieces of cigar box wood, and elastic band or string. When fixed in a 10 per cent. "hypo." bath, and not toned, the prints have a pleasant warm brown color. If, however, a grey tone is preferred, the prints should be well washed before fixing, and toned in a solution made by dissolving 15 grains of chloroplatinite of potassium in a pint and three-quarters of water and adding five drops of hydrochloric acid.—Photographic Work.

Some Tall Buildings.

The Masonic Temple, Chicago, has 20 floors above ground and a height from sidewalk to roof coping of 274 feet. The New Netherlands Hotel, New York, will have 17 floors and will reach to a height of 210 feet above the sidewalk. Among the newer buildings erected in Chicago are the Katadin and Wachusett, each of 17 stories and 200 and 205 feet high respectively, from the sidewalk to the top of the roof. The Old Colony, another 17-story building, will be 215 feet high from sidewalk to roof. The Hartford and the Ellsworth buildings, each of 14 stories, will be, respectively, 165 and 170 feet high from sidewalk to roof. No restrictions are placed on the height of building in New York for office purposes, but the law says that dwellings shall not be over 70 or 80 feet high, according to the width of the street. Chicago last month fixed the greatest height of buildings at 130 feet; and in Boston no building, except the spires of churches, may be made over 125 feet high.

For a family wine ours can not be excelled. California Wine Company, Limited, 55 and 57 Broad street.

SAYWARD

Situate Exactly Opposite the Historical Fort Sheppard, on the East Bank of the Columbia River at the Mouth of Beaver Creek, about Four Miles North of the Pend D'Oreille River and International Boundary Line.

SAYWARD Is a typical site for a large city, it is level bench land, perfectly adapted for building purposes, and is the Selected Junction of the River and Railway Transportation.

SAYWARD Is the only natural location for a centre of supply for the great Placer and Hydraulic Mines on the Pend D'Oreille and Salmon Rivers, and the Gold and Silver Mines of Trail Creek, now supplied by wagon road from the United States.

SAYWARD Is the Headquarters of the Contractor of the Nelson & Fort Sheppard Railway, now under construction. The main Railway Line runs through the Company's property, and a spur is to connect with the Steamboat Landing where all supplies are now being delivered for over One Thousand Railway Navvies.

Commissariat, Stores, Hotel Offices and Wagon Road now in course of construction, and an increasing daily business is being transacted. Alternate daily communication from Revelstoke, B.C., via Canadian Pacific Railway, and Northport, U.S., from all points south by the Spokane Falls & Northern Railway.

Sale of Lots commences at 11 a.m, THURSDAY Morning at my Office, No. 7 Board of Trade Building.

PRICES—$150 for Corners; $100 for Inside Lots. TERMS—One-third cash, one-third in two months, one-third in four months, with interest at 8 per cent. per annum on deferred payments.

For THE WEST KOOTENAY LAND COMPANY, L'd L'y,

JOSHUA DAVIES, Manager.

Nakusp & Slocan Railway Company

NOTICE.

Sealed tenders will be received up to noon on Wednesday, the 7th June next, addressed to the undersigned, care Messrs. Wulffsohn & Bewicke, Ltd., bankers, Vancouver, B.C., for the construction of this company's railway from Nakusp to Forks of Carpenter Creek.

Forms of tender can be obtained on application to the undersigned at the company's office, Victoria, B. C., and at the office of Messrs. Wulffsohn & Bewicke, Ltd., Vancouver, and no tender will be considered unless made on such form.

The lowest or any tender will not necessarily be accepted.

Victoria, B.C., May 8th, 1893.

A. J. WEAVER BRIDGMAN,
my16-tu-sa-td Secretary-Treasurer.

NOTICE OF ASSIGNMENT.

Pursuant to the Provisions of the Creditor's Trust Deeds Act, 1890.

Notice is hereby given that James Munroe Miller of the city of Victoria, printer, by a certain deed dated and executed by him on the 18th day of May, 1893, assigned to me, Thomas T. Hull, of the same place, accountant, all his real and personal property for the purpose of paying and satisfying rateably or proportionately, and without preference or priority, all his creditors their just debts.

The said deed was executed by me, Thomas T. Hull, on the 18th day of May, A.D. 1893. All persons having claims against the said assignor are requested to send them in on or before the 31st day of May next to me the undersigned with full particulars in writing, signed by the party claiming.

All persons indebted to the said assignor are also required to pay the amounts due by them to the assignor, to me on or before the above date.

THOMAS T. HULL.

It is necessary that copy for changes of advertisements (to be sure of insertion) should be handed in on the day previous to that of their appearance.

The Daily Times.

RATHER SMALL.

Letter carriers are proverbially a long-suffering class of officials. The Dominion Government should, however, use a little of the "milk of human kindness" in its dealings with these hardworked and underpaid employees. An unnecessary cause of discontent is given by the government in stopping the pay of sick carriers and compelling the others to discharge their duties. The carriers contend that if the other members of their staff work overtime to help a sick man, either the pay should go to the sick man or be divided pro rata amongst those who do his work. As the system is administered now, if a carrier is sick for a day or two his work devolves upon the rest, the government at the same time keeping back his pay. The country hardly expects the government to descend to such petty meanness as this in its care of the public purse, and they look all the more disagreeable when the people keep in view the celerity with which large sums escape from the treasury for "value unreceived."

NATURALIZATION ABUSES.

The free naturalization of Asiatics at New Westminster for the purpose of qualifying them to receive fishing licenses has naturally raise a storm among the white fishermen, who find themselves in danger of being driven out of the business completely. The Fishermen's Association has taken the matter up, and is circulating a petition to the Minister of Marine, which sets forth the evils of the practice referred to and prays that a remedy may be applied. The petitioners request that, "to save trouble on our rivers by desperate men whose rights are being trampled under foot to satisfy the greed of monopolists," the following system of licensing be adopted:

1. That no Japanese be granted a license.
2. That no individual or fish dealer shall be granted more than one license; and that the number of licenses now granted to the canning companies be greatly reduced.
3. That no one but the person procuring said license be allowed to fish on said license.
4. That the price of one fishing license shall be five dollars ($5) per year in all parts of the province.
5. That any man properly qualified be granted a license.

Apparently it was intended that the first clause should apply to Chinese as well as Japanese, since there could be no good reason for discriminating in their favor. In commenting on this petition the Columbian expresses the following sentiments, with which we entirely agree: "It is to the interest of the large, that the fishing industry should be preserved to free white labor, instead of being suffered to drift wholly into the hands of the degraded slave labor, which is the inevitable trend at present. We trust that the petition of the Fisherman's Association may receive the immediate and earnest consideration of the Ottawa authorities, and that prompt action may follow."

THE BY-LAWS.

Judging from the slim attendance at last evening's meeting most of the citizens are either careless about the passage of the by-laws to-morrow or are hostile to them. We trust they have at least looked into the matter for themselves and will come to a decision on rational grounds. They have to consider that if the money for sewerage construction is not raised on general debentures, as proposed, it must be raised on local improvement debentures at a much higher rate of interest. The only other alternative is leaving the sewers unconstructed, and that is by no means a pleasant one. From present appearances it must be concluded that the ratepayers prefer either to try the local improvement plan or do without the sewers.

Whatever may be the fate of the other by-laws, we earnestly hope that the one relating to the schools will be carried. Under present conditions the younger generation is not receiving fair play, and an improvement is absolutely necessary. It is hardly possible that the small yearly outlay which the school loan would entail can outweigh with the citizens the health and mental progress of their children.

The Globe: "The secretary of the Woollen Manufacturers' association, in consideration of the threatened loss of tariff privileges, says there is too much unnecessary antagonism on the part of the workingmen. The workingman is in demand when tariffs are being secured, but is not wanted when they are being divided."

The gubernatorial chair of the state of Ohio seems to exercise a malign influence on the fortunes of its occupants. Foster, Campbell, Foraker and McKinley, who have filled it in succession, have all gone to the wall financially.

CANADIAN DISPATCHES.

The News of Eastern Canada in Short Paragraphs.

Fifty families of Germans living near Chicago are about to emigrate to Manitoba.

Great preparations are being made by the Canadians in Chicago to celebrate Dominion Day at the World's Fair.

The sawmill belonging to P. W. Wagner, at Port Elgin, was burned. Loss, $3000; insurance, $1000 in the Waterloo Mutual.

Harry John Ashman, auctioneer, Montreal, has been arrested on a charge of setting fire to his premises, which were recently destroyed.

Maggie Lacker, aged 20 years, is in jail at Guelph on a charge of infanticide. Her brother Alexander, who she says is the father of her child, has left for parts unknown.

Robert Patterson and wife, of Plattsville, Ont., were killed by a G. T. R. train while attempting to cross in front of it. The horse was also killed and the buggy smashed.

The Ontario Reformers have decided to make a campaign in local politics this summer, and are arranging for a series of meetings and picnics immediately after the Ottawa convention.

The Northwest Transportation Company's steamship Monarch arrived at Sarnia on Monday, being the first boat to land from a Lake Superior port. She encountered heavy snowstorms.

The honorary degree of D. C. L. is to be conferred on the Governor-General and Bishop Potter of New York, at the centennial convocation of Bishop's college, Lennoxville, Que., shortly.

Mrs. H. Stanton and Miss J. Stanton, of New York, narrowly escaped being thrown 205 feet into the river at Niagara Falls by a horse running away with a carriage over the suspension bridge. The carriage collided with the rails of the bridge and checked the horse.

A cable dispatch from Glasgow stating that the Allan line was about to be converted into a joint stock company is confirmed. Andrew M. Allan, a member of the firm of Hugh & Montague Allan, being now in England for the purpose, it is impossible as yet to secure any details.

The time allowed Archbishop Faire to file his plea in the suit brought against him for $50,000 by the Revue Canadienne expired yesterday, but nothing was done as it is only a matter of procedure. However, the court will undoubtedly grant an application for an extension of time upon payment of the usual fee.

In military circles it is stated that General Herbert overstepped his powers in commuting the sentence now being worked out by men of the permanent corps for infraction of the military law. An order-in-council is in existence stating that when the major-general commanding is absent from Canada the Adjutant-General shall have full charge of the militia.

The Foreign Missionary committee of the Canada Presbyterian church has appointed Kenneth McLennan, graduate of Montreal college, and Miss Jessie Grier, of Toronto, to the mission field in India. The committee did not think it was within its work to send missionaries among the Mormons in the Canadian Northwest. It was announced that Dr. McKay, the great missionary, and family, would leave Formosa this year on a visit to Canada.

It is understood that cable communications have passed, within the past few days, between the Government of Canada and those of the different Australian colonies, with a view to united action in the matter of the new direct steamship line between Sydney and Vancouver. It is thought the sister colonies will contribute towards a subsidy for the line apropos to the interest aroused in Australian matters since the announcement was made that a direct service would be inaugurated. Recent advices from the antipodes indicate a disposition to welcome a commission from Canada to discuss closer trade relations as well as united action in reference to a Pacific cable.

In January last Col. Rankin, father of the actor, McKee Rankin, died in Windsor. He left among other estates, property in Algoma worth in the neighborhood of $80,000, which he conveyed to Harry Lye, the liquidator of the Central bank, for an annuity of $1200. Now a son, George Rankin, of Windsor, and Mrs. S. V. Hutchinson, niece of the late colonel, of Toronto, are seeking to set aside this conveyance, claiming that it was incomplete and improvidently made. To fortify themselves they have filed a lis pendens upon the property. Their claim was tested in chambers lately by a motion to have the lis pendens removed, but the court adjourned the motion for a week to allow a settlement.

In the Ontario legislature just before prorogation, Hon. Mr. Hardy moved the House into committee of the whole to consider a number of railway and mining resolutions. These resolutions showed the government was making some attempt to develop the mining resources of the province as to roads it was proposed to run through mining territory. The government had decided to grant railway subsidies as follows: Irondale, Bancroft and Ottawa Railroad, $3000 a mile for 15 miles; Ottawa, Arnprior and Parry Sound Railroad, $3000 a mile for 35 miles; Kingston, Napanee and Western, $3000 a mile for 30 miles; Central Counties, $2000 a mile for 46 miles. Mr. Hardy said the government had been strongly urged to grant aid for blast furnaces. They were unable as yet to decide in favor of aiding a smelter in the mining district. The difficulty was that if one company was aided others would desire recognition, and it would be difficult where to draw the line. In the nickel industry there were four furnaces at work. These were originated by private capitalists. The Dominion government was in a state of doubt as to how far they should continue to aid the iron industry, either in the shape of a subsidy or by bounty, and all things considered the provincial government did not feel that they could do anything in the direction asked for. The opposition, while concurring in it as far as it went, objected that the policy was not hard enough and an amendment was moved to that effect. Mr. Fraser moved an amendment practically confirming the original motion, which, being pressed to a vote, was carried. Commee (Algoma) voted against it. The resolution was then passed in committee and reported, and a bill introduced and passed confirming them.

TRADE WITH AUSTRALIA.

The First Steamship to be Welcomed With An Address.

A MEMORIAL TO THE GOVERNMENT

From the Board of Trade Urging the Development of Commerce by Reciprocal Legislation and Treaties—The Marine Hospital.

The council of the board of trade met this morning at 11 to take some action in regard to the new Australian steamer line. An address properly engrossed will be presented on the arrival of the first steamship, and a memorial to the Dominion Government was decided upon. President Hall presided and those present were Messrs. W. H. Ellis, F. H. Worlock, Robert Ward, C. E. Renouf, J. H. Todd and Secretary Elworthy. President Hall brought the matter up. He said he felt if the steamers came alongside the dock and did not anchor in the roads, something should be done for them. Otherwise he did not propose to do anything.

Mr. Ellis said he had positive information that the steamers would come to the dock.

Mr. Ward deprecated the idea of a demonstration. Nothing should be given. Such affairs were mawkish and puerile. They had presented a set of colors to a steamer which only ran a few trips to Victoria. He recognized the importance of the inauguration of a steamship line between Australia and Canada, and hoped that the board and everybody would do something practical to help it. He wanted all other ideas dismissed from their minds. He agreed with the president on the docking proposition. Here was an important trade to be built up. It had been carried on for years by American steamships from San Francisco to Sydney. Many articles made in the Dominion were consumed in Australia. As to British Columbia, lumber was the most important, but there was a heavy tariff on it in every Australasian colony and no differential duty. At the Congress of Chambers of Commerce Sir Charles Tupper, evidently speaking for the Dominion Government, had strongly put forth the doctrine of reciprocal trade between the colonies and the mother country. The opportunity had now come to put the idea in force. The speaker did not know the feelings of the people of Australia, or if they preferred British Columbia timber, but he believed the two governments could agree to an arrangement that would build up a good trade. He hoped that the steamer service might develop into a fortnightly one. British Columbia salmon in fair quantities had found a market in Australia, but it had to be shipped via San Francisco, at great cost. If shipped direct it would be decidedly more economical. There was also a heavy duty in the colonies on it, but the governments should be able to agree about giving better terms than the United States could offer. It would be of great mutual benefit, and he hoped the ministers would grasp the question broadly. The Dominion Government had shown its willingness to fall in line, when it gave the subsidy, but it must go further. He then offered the following resolution:

That in view of the inauguration of a direct steamship service between Australia and Canada, in the opinion of this board it is desirable in every way to promote and foster our trade relations with the Australasian colonies, and that the Dominion government be moved to take into consideration with the respective governments of the Australasian colonies, the customs tariffs now in force on both sides and to arrange such alterations thereto as will encourage the development of reciprocal trade between the Dominion of Canada and Australasia.

Mr. Ellis agreed with the resolution fully, but maintained that something should be done in the way of a welcome, if it was only an address. Mr. Todd agreed with him. So did Mr. Worlock, who said it seemed the consistent thing to do. Mr. Ward still thought it was not practical. Mr. Ellis then offered the following resolution, seconded by Mr. Todd:

That an address be prepared and presented by this board to the owners of the line now established between Canada and Australia, on the arrival of the first steamer at this port.

The resolution was adopted and Mr. Ellis, Mr. Todd and Secretary Elworthy will draw it up and present it.

The resolution of Mr. Ward was then taken up. Mr. Renouf said that Australian wool and mutton could be placed on the free list. Mr. Worlock seconded the resolution and it was unanimously passed. Copies of it will go to Ottawa and the Boards of Trade of Canada.

A letter was read from the International Reciprocity association, which will convene in St. Paul June 5 and 6, setting forth the aims of the association and inviting the Board of Trade to send a delegate. President Hall said that any Canadian who would take up the McKinley tariff would be slow about going into a thing of that kind. The tariff was a direct rap at Canada.

Mr. Ward thought that reciprocity in the broad sense would do good and the board could safely say that it was in favor of it. That was, of course, in so much as it did not interfere with the mother country or in any way discriminate against her.

Mr. Ellis thought that any proposition for reciprocity should come entirely from the United States.

The secretary will write the association announcing the board in favor of reciprocity as outlined in the foregoing, and expressing regret that it will not have a delegate at the meeting of the association.

The secretary will acknowledge the receipt of a picture of the Conservative members of parliament, sent to the board by the Toronto Empire.

A letter was read from L. Coste, of the public works department, saying that the hon. minister of public works would not be here until the fall. It was received and filed.

The secretary read the following letter, which is self-explanatory:

Sir,—I have to acknowledge receipt of your letter of the 20th ultimo, transmitting copy of the resolution of the Board of Trade, in reference to the Marine Hospital at Victoria, and in reply I am to inform you, that as satisfactory arrangements have not been made with the Royal Jubilee Hospital, the Department proposes to continue the Marine Hospital in operation. With reference to the statement contained in your letter in regard to the matter of profit, alleged to have been made by the Dominion Government, in connection with the care of sick seamen, I am to point out to you, that in the report given of the proceedings of the Board of Trade at the meeting held on the 6th of January last, it was alleged that the Government had made a clean profit of about $2000 in 1892, so far as the Marine Hospital was concerned, and I am now to point out to you that the expenditure on account of the hospital, for the fiscal year referred to, amounted to $2628.80, while the receipts for sick mariners' dues at the port of Victoria amounted only to $1545.08, from which it will be seen that the expenditure was largely in excess of the receipts. The Department, however, has no desire to ignore the fact, that owing to the exceptionally large receipts for sick mariners' dues at the port of Nanaimo during the past fiscal year, and the fact that no expenditure was made by the Department of Public Works, in connection with the Marine Hospital at Victoria, the receipts for the Province were largely in excess of the expenditure, but this in no wise affects the statement made in my letter of the 2nd of March last, in regard to the expenditure from 1873 to 1892, being largely in excess of the receipts on account of sick mariners' dues.

I am, sir, your most obedient servant,
WM. SMITH,
Deputy Minister of Marine and Fisheries.

Mr. Renouf remarked that the communication was a sort of come down. It was received and filed.

AMERICAN NEWS NOTES.

Daily Chronicle of Events in The Great Republic.

Canton, O., May 31.—General J. R. Sherwood, editor of the News-Democrat, and an ex-congressman, has brought suit against Col. J. J. Clark, a prominent G. A. R. man, for $25,000 damages. The suit grows out of an assault made on the general on May 19th. The petition alleges that Sherwood was struck on the back of the head and permanently injured. The quarrel grew out of articles which appeared in the general's paper, criticizing Mr. Clark, who was a national member of the Women's Relief Corps. General Sherwood was to have delivered the memorial day address at Rhinebeck, N. Y., but was unable to leave his bed.

New York, May 31.—Parthenia Rung, aged 25, Sarah Foustain, aged 27, both colored domestics of Mrs. Chatfield at 440 Putnam avenue, Brooklyn, were found dead in bed this morning, suffocated by gas, which was found escaping from a burner turned on full force. The women came from Virginia a week ago, and it is supposed through ignorance blew out the gas.

Paris, May 31.—It was 462 years yesterday since the French heroine, Joan of Arc, was burned at the stake by the English as a sorceress and heretic. After a lapse of four and a fifth centuries, however, justice has been done to her memory, and to-day, according to a despatch from Rome, Pope Leo has crowned his episcopal jubilee by announcing her beatification. The announcement gives great satisfaction to French Roman Catholics, as it is regarded as a signal tribute to the patriotic spirit of the country.

Chicago, May 31.—There was an immense throng of sight-seers at the World's Fair yesterday, and it is believed that the attendance will come very close to that of inauguration day. This afternoon the silver statue of Justice, for which Ada Rehan posed as the model, was unveiled in the mines and mining building. A large number of Montana people were present, and after the unveiling indulged in a general festivity. The dedication of the Montana building will not take place until late in the summer.

Louisville, Ky., May 31.—The sight of two women with chain and ball attached to their ankles attracted considerable attention on the streets here to-day. The pair belonged to Louisville's "colored" contingent, and having been fined repeatedly for disorderly conduct, and refusing to pay the fines or reform their ways, this measure was resorted to as a punishment. It did not have the desired effect, as both stubbornly refused to do street work. They will, as a sterner resort, be starved into submission.

Alanta, Ga., May 31.—Governor Northern has commuted the sentence of Dr. von Poltnitz to imprisonment for life. He is a German baron, and has been husband of two well-connected South Carolina women, both of whom are dead. His last wife was Miss Pulled, daughter of a Baptist preacher. He beat her the day and she returned to her father. Shortly after she died. A coroner's jury declared her husband was responsible for her death, and he was tried and sentenced to death. The case was carried to the Supreme Court, where a new trial was refused.

"SWEPT AWAY."

Ald. Baker, Duster in Hand, Prophesies on the Sewerage By-Law.

Aldermen McKillican, Styles, Belyea and Baker were smoking and chatting in the council chamber this morning previous to the special meeting.

How did you like the meeting?

Ald. McKillican spoke of the public meeting last night, and his question was to none in particular.

Ald. Belyea volunteered a reply. "The sewerage by-law is going to carry. All the property-holders were there last night. Only a handful were against it." Ald. Styles smiled and Ald. Baker picked a duster from his desk. The city hall janitor had been dusting the aldermanic seats and desks a few minutes before, and had forgotten to take his duster. Ald. Baker attracted the attention of the other aldermen. "The sewerage by-law will go like this." And he gave a sweep of the brush over the desk. There was a laugh. Mayor Beaven entered the council chamber, took his seat and called the council to order.

P. O. HOME.

Corner Stone to be Laid on June 24th With Masonic Honors.

The corner-stone of the new Protestant Orphans' Home is to be laid on Saturday afternoon, June 24th, with full Masonic honors. The grand lodge A. F. & A. M. will be in session at the time and all the members will be present and take part in the ceremony. The foundation for the new building will be completed by that time, and after the corner-stone has been laid work will be commenced on the building proper. The programme for the ceremony will be arranged in a few days.

It is just ten years ago that the Masons laid the corner-stone of the present home, which was then considered large enough for many years. At present, however, it is found entirely inadequate, but as the new home will soon be ready the little inmates will not be long inconvenienced.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

SEEKING INFORMATION.

Ministers Haggart and Patterson Pay a Visit to Victoria.

PROSPECTIVE RAILWAY CONSTRUCTION

Not a Certainty that C Battery is to be Removed From Victoria—Work on the Esquimalt Fortifications to Commence as Early as Possible.

Hon. John G. Haggart, minister of railways and canals, and Hon. J. C. Patterson, minister of militia and defence, accompanied by their secretaries, arrived in the city last evening. Hon. Senator Macdaren and Dr. Montague, M. P., who came across the continent with the party, remained at Vancouver. The party took in all the points of interest between Ottawa and Victoria. They went down as far as the Crow's Nest, but did not enter the pass.

Hon. Mr. Haggart was asked for his views regarding the prospect of railway construction in British Columbia. He replied that he thought the C. P. R. would build through Crow's Nest pass into the Kootenay country early next year. Some grading had already been done and a party of surveyors were now in the pass laying out the route. The work of grading would go on this year and early next year actual construction would commence. It was also very likely that the line from Revelstoke to Arrow lake would be built and also the Nakusp & Slocan line. He would not venture an opinion regarding the Canada Western or British Pacific. "In fact," he said, "I do not know anything about the line." He did not have a very good opportunity of seeing the Kootenay country this trip. He visited that district some time ago, and he then posted himself as to its requirements.

Hon. Mr. Patterson had just received a dispatch from the Governor-General's aid-de-camp stating that the Queen had consented to the Canadian artillery being called the Royal Canadian Artillery. This was an honor conferred on the Queen's birthday. In regard to the Esquimalt fortifications he said all arrangements had been completed and work would be commenced as soon as possible. His object in sending Gen. Herbert to England was for the purpose of completing the necessary arrangements. He could not say when work would be commenced, but it would certainly be this year. Nothing definite had yet been done relative to the removal of C Battery; in fact, it was not yet certain that the battery would be removed.

The ministers were to-day taken charge of by Lieut.-Col. Prior, M. P., who drove them to C Battery barracks, Esquimalt, and other points of interest around the city. Hon. Mr. Patterson inspected the battery and also spent some time at Esquimalt, where the fortifications are to be built, and obtained a great deal of information.

Both gentlemen expressed themselves as well pleased with their trip, on which they have already spent two weeks. They have had fine weather and a pleasant time wherever they stopped.

A deputation of riflemen will wait on Hon. Mr. Patterson this evening in regard to range matters. They will ask that a new local range be provided in place of the Clover Point range, which the city has prevented them from using. They will also ask an appropriation to cover part of the cost of putting the Goldstream range in order. The rifle association spent about $800 on this range and as it is usual for the government to give something in similar cases, they expect some help.

HOSPITAL DIRECTORS MEET.

The Ambulance to be Used for Jubilee Hospital Only.

At the meeting of the directors of Jubilee Hospital held last evening, the following were present: I. Braverman, A. Wilson, C. Hayward, J. Braden, W. M. Chudley, G. W. Brown, H. D. Helmcken, A. C. Flumerfelt, E. C. Baker, J. S. Yates, D. M. Eberts, and H. M. Yates, secretary. The vice-president, Mr. Hayward, presided.

Mrs. Florence Tilten, leader of the King's Daughters, wrote asking that a room to hold two beds should be set apart to be furnished by them, and for the right to nominate patients to occupy this room after they have furnished it, the patients occupying the room to receive the attention of the King's Daughters, but they to take no further responsibility.

It was decided to grant the request, provided of course the matter came within the rules of the hospital.

Mr. Flumerfelt, of the committee of the month, made a verbal report on the improvement work being done at the hospital.

Complaint was made that a member of the consulting staff had ordered the Dupont ambulance out to convey a typhoid fever patient to another institution. It was decided to inform the consulting staff that the ambulance was for the conveyance of patients to Jubilee Hospital, except in cases of accident.

The treasurer reported that the Arion Club's concert had netted about $150.

It was decided to issue diplomas and medals to the nurses entitled to them, and Dr. J. S. Helmcken will make the presentation.

Mr. Baker brought up the subject of pictures in the hospital. They would be preferable to the bare walls. It had been feared that the pictures would collect dust and infection, but he thought it would be a good idea nevertheless. He had several himself which he would present. The plan will be carried out unless the consulting staff object.

LIGHTING PLANT PURCHASED.

The Tramway Company Purchase Mr. F. H. Osgood's Lighting Plant.

The National Electric Tramway Company have completed the purchase of the lighting plant from Mr. F. H. Osgood, of Seattle, who has controlled and operated it for the last two or three years. The consideration was about $50,000, and the equipment purchased consists of dynamos, 30 miles of wire and 3700 lamps installed. It is the intention of the tramway company to treble the capacity of the lighting plant immediately, its plan involving the employment of Goldstream water power for the generation of both tramway and light currents. The company expects to be able before the fall of the year to supply all demands for light from private parties, and it also expects to render at a cheap rate for the lighting of the streets.

The estimate is that about double the number of street lights could be supplied for the same cost as at present. The use of the water power will mean a great reduction in the cost of generating the currents.

Parasols and Sunshades

25c., 50c., 75c., $1.00, and a perfect gem for $1.75. Lansdowne House, 86 Yates street, Jno. Partridge, proprietor.

Ball at the Mount Baker.

The formal opening of the Mount Baker Hotel will include a dance on the evening of June 7th, for which invitations will be issued this week. The committee in charge of arrangements is composed of Hon. D. W. Higgins, H. D. Helmcken, J. S. Yates, Allan Cameron, R. Jones, A. G. Smith, and H. B. Haines, honorary-secretary.

Companions of the Forest.

Messrs. A. J. and H. L. Salmon, and E. and J. R. Johnson, Mrs. Salmon and Miss Salmon returned from Vancouver last evening, after having on Monday evening completed the organization of Pacific Bell Circle Companions of the Forest. The new lodge starts with 45 members, and will be followed by organizations in Nanaimo and New Westminster.

Anniversary Services.

Anniversary services will be held next Sunday in the Centennial Methodist church, Gorge road. Rev. J. H White will preach in the morning and Rev. C. Watson in the evening. On the following Wednesday evening the anniversary tea will be held, when U. S. Consul Myers will occupy the chair. The programme will consist of speeches and music.

Special Meetings.

The meetings held nightly in the Emmanuel Baptist church are increasing in interest. The preaching of the Word is blessed to many and the interest in the stereopticon views remains unabated. The views of Bunyan's Pilgrim's Progress were particularly fine. Mr. Marston invests his subject with such freshness and displays so much tact and resource that the audience never wearies. A number have already been much benefited. The subject to-night is, "Almost Persuaded," followed by a series of views that may be designated "With Stanley in Africa."

Robert Gaylor as "Sport McAllister."

On Friday night at the Victoria theatre Robert Gaylor will appear in his new play, "Sport McAllister, one of the 400." Mr. Gaylor is well and favorably known throughout the country. No gross exaggeration, however, disfigures his work. The late Dion Boucicault, a short time before his death, attended a performance of W. A. Brady's "After Dark" company and when asked by Manager Brady what he thought of Gaylor's acting, replied, "I like him; he is a comedian free from vulgar methods and exaggerated ideas, and one of the best and most natural stage Irishmen I ever saw." This was praise indeed, for Boucicault was acknowledged to be the greatest Irish comedian of his time.

Point Comfort Hotel Co.

The annual meeting of the shareholders of the Point Comfort Hotel Company was held yesterday at the office of A. W. Taylor & Co., Trounce avenue. The provisional directors gave the results of their work during the last six months, and their action was indorsed by the shareholders. The following directors were then elected: Thos. Earle, M. P., Dr. Milne, F. H. Worlock, M. H. Redmond, Johann Wulffsohn of Vancouver, R. Erskine and W. H. Mawdsley. The secretary reported upon the affairs of the company. He said the hotel at Mayne island was nearly finished. Many applications for rooms from excursionists and tourists have been received.

The New City Map.

Messrs. M. W. Waitt & Co. are the publishers of the latest map of the city of Victoria, and have just placed it on sale. Copies may be seen in the windows of the music store, Government street. The map is a splendid production, the work of Mr. Gottfried E. Jorgensen, a talented young Danish draughtsman employed by the lands and works department. The map is a complete departure from former styles, and the publishers claim for it two qualities which should render it extremely valuable to all who require a city map—absolute accuracy and perfect clearness. And it might be added that there is plenty of space left whereon to mark additions, alterations, etc. Everyone who has examined the map praises the work. It will prove not only of great service but an ornament in any office. The price is extremely moderate, considering the excellence and the fine finish of the work.

Religious and Social.

St. Saviour's church anniversary was celebrated last night. Bishop Perrin, Archdeacon Scriven, Canon Beanlands, and Rev. W. D. Barber were present. Bishop Perrin preached.

After the services a reception was given to Bishop Perrin in Victoria West Hall. Rev. Mr. Barber, the pastor, read the following address:

To the Right Reverend the Lord Bishop of Columbia:—

We, the undersigned, rector, churchwardens and parishioners of St. Saviour's church, beg to tender you a welcome.

We unite in offering you our loyal support, both in parochial and diocesan work, and trust that you will be long spared to minister to the needs and develop the life of the church in British Columbia.

(Signed)

RECTOR AND CHURCHWARDENS OF ST. SAVIOUR'S CHURCH.

Victoria, B.C., May 30, 1893.

Bishop Perrin replied, thanking them for the reception and complimenting them on their parish and efficient pastor. He was then introduced to the members of the congregation, and refreshments were served by the ladies.

The Y. M. C. A. Floating Bath.

The board of directors of the Y. M. C.A. held a meeting last evening at the home of Dr. Ernest Hall, Fernwood road. Among the business transacted was the formal appointment of Mr. John St. Clair as physical director of the association. The subject of tendering a benefit entertainment to him for the generous manner in which he has given gratuitous instruction, both to the Y.M. C.A. and other organizations in the city, was very favorably considered. The date will be decided upon in a few days. It was also decided to proceed at once with the construction of the floating swimming bath, which has been talked about a good deal lately. This bath will be 75x30 feet, and when finished one of the finest natatoriums on the coast. The swimming pool will be surrounded by a large number of dressing rooms and offices. Over the water there will be probably be several gymnastic appliances, such as trapeze, rings, bar, etc., upon which work can be done with perfect safety that would not be so readily attempted above a gymnasium mat. Diving platforms of various elevations will give all members a chance to take the plunge best suited to their disposition. The floating bath will be moored near Point Ellice bridge and Mr. St. Clair will have full charge of the instruction of the members. The bath will be ready, it is understood, by the end of June.

CIVIC BUSINESS.

An Amicable Meeting of the Council is Held This Morning.

At a special meeting of the city council, held this morning, a resolution authorizing the payment of civil salaries was passed.

Ald. McKillican asked if the question of the small-pox hospital was decided, and should it be a one or two-story building?

Mayor Beaven—The matter has been previously decided. It is going to be a two-story building.

Ald. Belyea said that it was no use trying to please every physician. They would never agree among themselves. The council should take the advice of its own sanitary officer. A two-story building had been favorably pronounced upon if well isolated. That ought to settle the matter.

Ald. Belyea called attention to the fact that an injunction had been obtained restraining the telephone company from erecting more poles on the street. The matter would come up on Friday. The objection taken was that the telephone company had not the consent of the council. He would like to see the council take action in the matter of granting consent.

Council then adjourned.

Y. L. I. BAZAAR.

Busy Times Around the Booths in Institute Hall.

Th bazaar at Institute Hall given by the Young Ladies' Institute in aid of St. Andrew's Roman Catholic Cathedral, opened at noon to-day, when a very fine lunch was served to a large number. This department of the bazaar will be kept up and promises to be a very successful one. This afternoon a large number visited the hall and inspected the now completed and well stocked booths and stalls. This evening C battery band will be present and furnish music throughout the evening. There will also be an excellent entertainment, including a sword, bayonet and barbell drill by a dozen young ladies in costume. This will also be given to-morrow evening, when the Bantley family will furnish a musical programme. Miss McDowell, president of the Institute, is directing the bazaar. She has excellent executive ability and is assisted by an able staff. They have a finely arranged and decorated hall and many articles of value for sale and raffle. Those in charge of the booths are:

Fancy stall, pale pink, Miss A. Keug, Mrs. D. Carmody, Mrs. Courtney, Miss Roarke, Mrs. Benson, Mrs. Leonard, Miss Leslouis and Miss Matthews; fancy stall, pale blue, Mrs. F. H. Lang, Miss Goddyn, Miss L. Kerg, Miss A. Finnerty, Miss Alice Smith, Mrs. Burns, Mrs. Steinfeldt, Mrs. J. A. Tepoorten and Mrs. Frederickson; plain goods stall, Mrs. Murphy and Miss Dickson; flower stall, Miss Conlin and Miss O'Connor; soda water fountain, Miss Mamie Dwyer and Miss Steele; ice cream stand, Miss Flo O'Brien and Miss Winnie Gilligan; candy stand, Misses M. and C. Baines and Miss Gibson, and wheel of fortune, Mrs. John Teague, jr., Miss K. Finnerty, Mrs. Cox and Miss Seaton.

On exhibition at the bazaar is a portrait of His Holiness Leo XIII, painted by J. Carpenter, and presented to Bishop Lemmens. It is a copy of an etching by Thaddeus.

A Small List.

County court will be held to-morrow before Sir Matthew Baillie Begbie, sitting as county court judge. The list of cases is unusually small, consisting only of the following summonses: Default 11; adjourned default 5; judgment 12; adjourned judgment 9; garnishee 17; appeal from summary conviction 1; total 55.

Opening of the Vienna.

The dining-room of "The Wilson," Yates st., is now known as "The Vienna" and open as a first-class restaurant. Both the service and the kitchen have been so much improved that guests going there will recall dining in one of the best restaurants in either Paris, Vienna or New York. Mr. Charles Eissner, formerly of Delmonico's, New York, is now managing this splendidly furnished and conveniently situated establishment, where meals may be obtained at all times. Table d'hote dinner is served from 12 to 2 at 35 cents, and from 5 to 8 at 50 cents; with wine, 75 cents. Choice wines, liquors and cigars always on hand. *

Nat C. Goodwin.

Next Tuesday and Wednesday evenings will bring one of the best attractions that has ever visited the city, when the celebrated comedian, Mr. Nat C. Goodwin, will appear in his two greatest successes, "A Gilded Fool," and "The Nominee. Mr. Goodwin is recognized the world over as one of the greatest in his line, and the management of the theatre are to be congratulated upon having been able to persuade him to visit Victoria. The sale of seats opens to-morrow morning at 9 o'clock at Jamieson's, and prices have been fixed at $1.50, $1 and 50 cents, which are the lowest that Mr. Goodwin plays to anywhere. A crowded house for both performances is assured.

Celestials Had no Case.

Lee Wo charged John Bings with assaulting him. The charge was heard in the police court this morning. Wo swore that Bings knocked him down with his hand, near the E. and N. Railway engine house. Bings greased the celestial's coat and struck him with a stick. Two men were coming along at the time and Bings ceased hostilities. Bings afterwards attacked Lee Wo, said he would kill him and put him in a hole. Bings stated in the box that he was at work greasing car wheels and accidently struck against the Chinaman, who threw a stone at him. Bings said that he then threw the Chinaman to the ground and went on with his work. John Kennedy swore that Wo wanted him arrested. Wo stated that Kennedy knocked him down and put oil on him, and still insisted that he was the man, though Kennedy said he was not. Wo was then with Constable Abel. The policeman sustained the evidence of Kennedy. Geo. Ledingham, whom the Chinaman said was present, also stated that there was no assault committed. Magistrate Macrae stated that no assault had been proved.

Mrs. Nellie Hines.

Mrs. Nellie Hines, beauty doctor and magnetic healer, and massage treatment given, of New York, can be consulted free of charge at her parlors in the Doane Block, Douglas street. Room 6. *

THE QUEEN'S LAUNDRY.

A Visit to an Interesting Establishment at Windsor.

The Royal laundry, or as it is more often called, the Queen's laundry, occupies the most picturesque site on the borders of the Richmond Park, which, in spite of its nearness to London, is still one of the most beautiful sylvan scenes in England; in fact, the garden and ground on which the laundry stands are practically a slice cut out of the side of the park.

A pretty ivy-covered cottage guards the entrance to the drive, and the gatekeeper is always at his post, for the laundry where the Royal linen is washed is sacred from the eyes of the curious. A drive lined on either side by green lawns and beds of roses, sweeps up to the entrance of the house attached to the laundry, where the superintendent, Mr. Wilson, lives. Mr. Wilson is an expert in the art of washing, for after a conversation with him on the subject one realises that it is an art. He has tested every machine connected with washing, and investigated every soap, so as to arrive at the best possible means and methods. He is by no means a merely ornamental adjunct—this superintendent; he is up and down in and out of the various departments at all hours of the day; nothing escapes his eye, he understands every detail and could give most laundresses many a hint. The laundry is a rather unpicturesque square building, with one small wing jotting out at the side—within the precincts of which Her Majesty's personal linen is washed, and where no unhallowed foot is permitted to tread. Luxuriant ivy mantles the walls, and in the summer time roses peep from among the dark leaves.

On entering, the first sensation is a strong odor of cleanness, combination of hot water and soap, which is rather pleasant than otherwise. On either side of the stone passage are huge cupboards, carefully ventilated, where the soap is stored; as several kinds are used, and they are for the most part bought a ton at a time, some space is required in which to keep them.

The entrance hall is stacked with big square baskets in which the linen is packed. They had just come from the sorting-room, where they have been emptied, and the linen sorted and compared with the lists that accompany it. The personal linen of the Royal Family never comes into this room. It has a sorting-room of its own. Unlike the rest of the linen it travels in wooden boxes, bearing brass plates inscribed with the wearer's name and its number, thus: "The Queen, 4;" "The Princess of Wales, 1."

The two washing rooms, one large and one small, lead out of the sorting chamber. The steam from the huge copper makes it almost impossible to see what is going on, but one can faintly distinguish two men stirring what looks like tablecloths with short poles.

In the small room the air is clearer, and it is possible to watch the manifold washings, boilings, rinsings, wringings, and starchings. All the household and table linen is washed in these two rooms. It was quite fascinating to watch the wringing machine at work; the linen goes into it straight from the rinsing tub and spins round as if by magic at the rate of 700 times per minute, until it is taken out almost dry.

Across the passage the towels and tablecloths are being mangled and pressed. They lie in great piles, each pile appertaining to a different palace or house. The majority of the linen is neatly marked in red cotton; V.R.I., with the palace underneath; O.H. or B.C. or B. P. Of late a stamp has been used instead of handmarking, doubtless an economy of labor, though it does not look nearly as nice.

Evidently the linen of the Royal household wears well, for some towels still in excellent condition bear the date 1869, while many others are only slightly more recent.

Towels are the largest class of articles on the laundry list, and when Her Majesty is at Windsor several hundred dozen are weekly washed at the Royal laundry, and a mangle is kept constantly working for this one item. And this is for the Queen's household alone; for although all the Royal body linen is washed at Richmond in order to avoid any risk of infection—though in face of revelations concerning the clothes of the Duke of York being made in a fever den, this precaution seems somewhat useless—the only household linen which goes there is Her Majesty's. That of the various Princes and Princesses goes to other laundries—the well-known Beulah laundry having the custom of the Prince of Wales.

Upstairs are the drying and ironing departments. The slides which draw in and out over the furnace are constantly replenished, for the things within them dry in a few minutes. The room feels like a Turkish bath, and the tablecloths, sheets, etc., hung on an infinity of lines, dry quite as well though not as quickly as in the slides. This room is chiefly used in the winter; the laundry has a splendid drying ground. Rows upon rows of posts support copper wires, and the grass plot looks as if it were converted into an original kind of maze.

Adjoining is a large building of corrugated iron, having open ends and revolving shutter-like slides, in order to regulate air and sunshine. This was an invention of Mr. Wilson's; not only is it used on showery days and damp nights, but it is of inestimable value on Sundays when the flow of linen backwards and forwards to the palaces and the laundry does not cease; for the Sabbatarians of Richmond would be hopelessly scandalized did they chance to see the linen of the head of the church reposing on the lines on Sunday. As it is, they are blissfully unconscious of the drying operations carried on in the iron building. Contrary to the usual custom, everything at the royal laundry is dried before it is ironed—a great expense of time and labor; but an excellent ironing machine saves much of the extra work. Here, too, is another of the huge, unwieldy mangles, an old-fashioned one on which Mr. Wilson says it is impossible to improve, though its size makes it impracticable for any but professional premises.

The ironing is not all done by machine. The pile of flat-irons of all sorts and sizes looks formidable.

The table linen is in the course of ironing. It is of the most delicate texture, but it is the beautiful designs even more than the fineness that fascinates. The cloths are all specially made for the Queen, and have her monogram ingeniously blended with the designs. The rose, the shamrock and the thistle prevail, and a variety of royal armorial bearings are introduced. Each tablecloth has a separate set of napkins to match it. Curiously enough, the Queen has a confirmed dislike to the ordinary-sized table napkin, and a specially small size resembling the serviette is reserved for her use.

The end of one of the large rooms is set apart for the callendar work; and here by the aid of a little white wax and the agate of the callender, the old chintz covers are made as good and as glossy as new. Chintz is very largely used in all the royal palaces, for not only is Her Majesty fond of the old-fashioned material, but it is more economical, because more durable than the softer cretonne, which is ruined by the hands of the washerwoman. Chintz apparently lasts forever.

But the covers for the Queen's private apartments must be "got up" in a different manner from the rest, and no callender is used for these. The truth is that chintz, although effective, has drawbacks; for it is often so slippery as to be difficult to sit on. At any rate, Her Majesty finds it so, and the covers for her use are simply ironed—not glossed at all. The flannel and woven materials are washed in the most approved methods, and of course no soda is used for them; an oil soap is used.

Everything is aired in a chamber warmed for the purpose before being sent back; and the sole duty of one woman is to keep changing the articles on the spiral staircase of rods, so that each may be thoroughly free from the suggestion of damp.

The body linen department, which is practically a separate house, communicates with the other part of the laundry by a door, the key which always rests in the superintendent's pocket.

So stringent are the rules that when some of the gentlemen of the household wished to go over it, and Mr. Wilson, unable to forbid it, said they must do it at their own risk—they did not venture.

It is difficult to say whether Her Majesty's order arises from the fear of infection, or from the dread of having her undergarments criticized and possibly even paragraphed. Truth to tell, there would be little to say concerning them, for Her Majesty's linen, though exquisitely fine, is severely plain.

The Princesses, however, give their fancy more reign and have beautiful linen; and they have a curious objection—it now almost amounts to a superstition—to wearing a flannel petticoat that has been washed. Once ready for washing these become the perquisite of the lady-in-waiting.

All the Royal body linen is washed with a special primrose soap, which is pleasantly scented and quite free from alkalies. The only disadvantage it has for less exalted personages lies in the fact that it is extremely costly.

No chemicals are used to whiten the linen, and in spite of many a recommendation from Sir John Cowell, the master of the household, Mr. Wilson remains firm in his refusal. Indeed he even speaks with bated breath of the "bleach" which he is obliged to call into requisition to remove stains; this he never allows unless he personally superintends the job. Indeed, he would advise the retention of the stain sooner than run the risk of rotting the linen.

He says, "If only people would put the table-cloth into cold water while the stain is fresh, it would come out far better than with bleach." The French methods of washing with the Lessive have been investigated by Her Majesty's superintendent, but he shakes his head at the foreign equivalent for soda, and murmurs "No good."

Mr. Wilson's task is not an easy one, for besides the constant supervision of the washing, the keeping of the accounts is no light work; and although everything must be of the best, the most rigid economy must also be observed, and no waste can be permitted in the Royal laundry.

And yet despite every effort in the direction of curtailing expenditure, the washing costs the Queen very little short of £5000 yearly.—Correspondence of the Scotsman.

THE UNIVERSAL LANGUAGE.

A High German Authority Concedes the Place to English.

The Germans not only look upon their language as an integral and essential part of their national life, but the more educated classes revere it with an almost idolatrous veneration. Notwithstanding the difficulties presented by its indistinct and crabbed type, its intricate and half illegible script, its arbitrary genders, its highly artificial inflectional system, and its illogical syntax, its study is extolled not only as a means of mental culture and discipline, but as an impulse to originality of thought and expression. These facts render all the more noteworthy the leading article in the April number, just issued, of Prof. Hans Del-Bruck's Preussische Jahrbucher, perhaps the most prominent of German literary reviews. It is from the pen of Dr. A. Schroer, professor of philology at the university of Freiburg, and its subject is the importance of introducing into the schools the study of a universal language (Weltsprache).

The writer begins by condemning all attempts, however scientific, to construct an artificial language, like Volapuk. No language which possesses neither literature, historical development, nor linguistic relations can ever serve as a medium of general communication, for the reason that no one will take the trouble to acquire it, merely as a "tool of the trade," until it becomes universal; therefore it never can become universal. Such attempts, however, are not only idle and aimless, because they can never obtain the general consent of mankind, but they are useless, for, says Prof. Schroer, there exists already a universal language, i.e., a language which, by its spread over the whole earth, and by the ease with which it can be learned, has already gained such a long step in advance that neither natural nor artificial means can deprive it of its assured position as the future medium of international intercourse. And this language is English.

It is interesting to find this fact acknowledged and promulgated by one of the foremost of German periodicals. During the present century the English-speaking population of the world has increased fivefold—from possibly 25,000,000 at its commencement to at least 125,000,000 at its close. No other language has ever been so rapidly developed; no fact in civil history is more significant than this. In all quarters of the world the English language is the conquering tongue; the wide spread of the English colonial system, the marvellous growth of the United States and the facility with which it absorbs every foreign element, bears witness to this great fact. There Prof. Schroer advocates making the study of the English obligatory, not necessarily to the exclusion of Latin and Greek, but at least in conjunction with them. "This," says he, "is not a question of taste or of rivalry, between the 'moderns' and the 'ancients;' it is simply a historical necessity."

Prof. Schroer is careful to warn his readers not to set their aim too high, for to learn to speak and write fluently and correctly a language which holds so high a place in the scale of culture and refinement as the English is "monstrously difficult;" but for the average man this is not necessary, for even the average Englishman has but a limited command of his mother tongue, and the daily intercourse of life requires but a small and easily acquired vocabulary. This is true of every language; but the absence of puzzling genders and inflections and syntactical forms renders the English easy, in comparison with others. "The English," concludes Prof. Schroer, "is the world speech, and will, to all appearance, become more and more so every year."—Philadelphia Ledger.

Waiting the Millennium.

The 5th of March is past and gone. The sun rose, set and rose again; the earth turned round after its usual fashion; its hundreds of millions of inhabitants got up, went about their business and lay down again to sleep; only in the Memorial hall in Farringdon street, of the city of London, was any watch kept upon the fleeting hours, or any note made of the fateful steps of time.

Out of all the swarming millions that crawl upon this earth only some 50 men and 300 women cared to mark the fact that another year had come and gone; that 1893 years were now passed, and only three more years remained in which to prepare for the coming millennium. The Memorial hall, we learn, had been suitably decorated for the occasion with huge cartoons representing the "Dream of Nebuchadnezzar," the "Dream of Daniel," and the "Pale Horse of Pestilence," and there beneath these pleasant emblems of prophecy sat the faithful few, while the latter-day prophets expounded to them the dread meaning of the Apocalypse.

Only three more years! On March 5, 1896, the end of the world, the resurrection of saints, and the ascension of 144,000 living Christians will take place, and the 350 watchful Christians of Farringdon street will meet with the reward of their pious vigilance. Bishop Richardson of the American Reformed church, and eight other clergymen, were the chief speakers at this conference, and as the greatest unanimity seems to have prevailed among them, we can only suppose that their hearers went away more convinced than ever that the time was at hand in which they should set their houses in order, and put all things in readiness for their departure.—The Spectator.

McGlynn en Route to Rome.

New York, May 31.—Father Thomas J. Ducey was asked yesterday about the report that Dr. McGlynn, instead of having gone to Chicago as reported on Monday, had really started to Rome to have an interview with the Pope. Father Ducey said: "Yes, Dr. McGlynn is on his way to Rome now. He is not in Chicago." Father Ducey says further that Dr. McGlynn had left quietly on account of his fear of misrepresentation at the hands of his enemies.

THEY ARE WELL!

Ready to Battle With Any Disease!

Their Nervous Strength is Full and Ample!

THEIR FUTURE IS BRIGHT!

A mighty change has taken place in the lives of thousands of men and women since the middle of the winter just passed. A host of old and young have made themselves well and strong by that true specific, Paine's Celery Compound. Debilitated, nervous systems have been thoroughly renewed and strengthened, so that the cured ones are ready to successfully resist any fatal disease that may prevail during the heat of summer. The dyspeptic, bilious, neuralgic and rheumatic are now as sound and hearty as they could hope for, and enjoy life to its fullest extent. Those who lingered long and suffered agonies from liver and kidney troubles are now in the enjoyment of perfect health.

Reader, it behooves you to seek that same fountain of health if you are now suffering. Do not allow yourself to be carried into the terribly oppressive heat of midsummer with your troubles, be they great or small. Paine's Celery Compound at this time will work wonders for you, and save you scores of dollars later on.

Spraying For Codling Moths.

The first spraying for the apple worm should be soon after the blossoms have fallen and when the fruit has set. At this time the calyx end of the apple is in an upright position, and presents a saucer-like cavity fitted for holding a portion of the arsenic which has been sprayed upon it. The eggs of the moth are placed in this cavity, and the apple worm, when it hatches and seeks to enter the fruit, eats a portion and is killed. If rain does not follow soon after the sprawing, the second application might be made a week or two thereafter.

As the moths issue at different times from their pupae (during two weeks or more), dependent largely upon the temperature to which they may be subjected in their different localities, and as there is a second brood in July, which again deposits eggs, the danger from the infestation is quite extended. But as the beneficial results from the spraying would be materially lessened after the calyx end of the apple has turned downward, comparatively few of our orchardists think it important to spray more than twice, provided the work has been properly done and not followed by rain.

No application for protection from the codling worm equals that of the arsenites—either Paris green or London purple, generally used in the proportion of one pound to 200 or 250 gallons of water.

I do not think the ordinary soapsuds from washed clothes would be sufficiently strong for use. Good results have been reported from a strong solution of soft-soap in water—six quarts to 50 gallons, if I remember aright.

It would hardly be safe to depend upon a tobacco solution. Possibly this or the soapsuds might serve to prevent the moth from depositing her eggs; or either, if they could be thrown upon the young larvae—as they hatch from the eggs—would unquestionably kill them, while they might not be poisonous if taken internally. They are useful against many of the young or smaller insects in their action, as "contact insectides."

A Year's Emigration.

The emigration from Ireland during 1892 showed the smallest volume, with four exceptions, since 1851. Only 50,867 persons left the country, and as the excess of births over deaths was greater by some thousands, the population actually increased. In 1862 the outflow was 190,000; in 1853 it was 173,000; and in 1854 the return was 140,000. Thereafter a decrease set in, which was maintained until the American civil war, when another rush took place and drained off over 332,000 in three years. The emigration altogether from 1851 to 1892 amounted to 3,518,383. Of the four provinces, Connaught, which is the poorest and least inhabited, contributed the highest number to the stream last year, Munster figuring second, Ulster third and Leinster last. The United States received 91.5 per cent. of the emigrants; Great Britain follows a long way behind with Canada and Australia in close competition. Other destinations include Buenos Ayres, South Africa, France, the Falkland Islands, India, the West Indies, and even Kamschatka; but in these cases the emigrants were no doubt professional men or persons carrying capital to new fields of enterprise.

The Tory Agitators.

London, May 29.—The central executive committee of the Conservative party are sending circulars to the Conservative election agents throughout the country stating that the registration bill introduced by Mr. Gladstone's government will not be allowed to pass, and that the next election will be upon the existing system of registration. The circular implies that the leaders of the Conservative party are confident that the general election will be held in the autumn or early in 1894.

LOAN BY-LAWS DISCUSSED

Well Attended Public Meeting Held at the City Hall.

MAYOR AND ALDERMEN EXPLAIN

Sewerage Occupied Most of the Time of the Meeting—A General Discussion of Municipal Affairs in Which Prominent Citizens Take Part.

Mr. Simeon Duck occupied the chair at the public meeting held last night for the purpose of discussing the by-laws to be referred to the ratepayers on Thursday. He called on Mayor Beaven to address the meeting.

His Worship said he thought that those gentlemen who opposed the by-laws should address the meeting first, but he nevertheless was very glad to give his views. The by-laws were very important ones, and the ratepayers should know in what position they would place themselves by voting aye or no. The amount involved was $865,000, divided as follows: $700,000 for sewers, $70,000 for electric light, $85,000 for education and $10,000 for the park. Already over $100,000 had been voted this year, and if the by-laws were upheld on Thursday the debt would be increased by nearly a million dollars. The present debt was not a very large one, but it was sufficient for those who contributed taxes yearly. Of course the debt would not be increased so much this year, as the $700,000 for sewerage purposes would be spread over three or four years. If the ratepayers are in favor of increasing the debt they must be in favor of an increase in taxation. The revenue from the tax on real estate this year will not be $200,000, while the revenue from other sources will be about $155,000, making a total of about $355,000. This is not as much as was received last year, but of course these figures are only approximate. During 1893 $15,000 will have to be taken out of the municipal revenue on account of the debt. If the by-laws are passed on Thursday the sum of $136,000 will have to be devoted to that purpose in 1894, and in 1896, when all the money is borrowed, it will require $162,000. Of course this increase would make it necessary to increase the rate of taxation. The sewerage system which has been adopted in this city is known as the separate system. Since he had had something to do with municipal affairs he had found out that the system required two sets of sewerage pipes. At one time a gentleman who said that the system would cost a million dollars was ridiculed and called an exaggerator. He for one did not see how the system could be completed for a million dollars. It would cost a great deal more to carry out the work by the local improvement by-law than it would cost to do it if the work was done by money borrowed on the credit of the city. The engineer had estimated that it would cost $2.90 per foot to construct the main sewers, therefore it would cost the owner of a 60-foot lot about $175 just to have the main sewer pass his premises. Then there would be the cost of building the connections. This would be very hard on some people if they had to pay it in cash. Some would say, well you could spread it over a number of years the same as it is proposed to do with the general loan. Of course this could be done, but the money could not be borrowed on such good terms as the larger amount. The local improvement debentures would also bear a much larger rate of interest and would probably be subject to a greater discount. If the money has to be borrowed it can be borrowed more advantageously by a general loan than by a local improvement loan.

Ex-Mayor Redfern—I think you said that if the by-laws were passed $161,000 would be required in 1896 for interest and sinking fund. Will not the $100,000 and $50,000 water works loans be paid by that time, reducing the amount required for interest and sinking fund by about $15,000?

Mayor Beaven—The $50,000 loan would be paid, but the $100,000 would not be due until 1898.

Senator Macdonald asked for an explanation of the increase in the proposed expenditure out of the revenue this year.

Mayor Beaven—The proposed health hospital and the schools are responsible for the increase.

Ald. Belyea held himself responsible for the increase of the amount of $700,000 proposed to be borrowed for sewerage purposes. It was on his motion that the amount was increased from $300,000 to $700,000, to be borrowed in three different amounts. The by-law, he said, was increased to $700,000 because he thought it should be decided whether the work was to be done under the local improvement or general loan system. The $700,000 would sewer the principal portions of the city. If the by-law was passed the councils for three years to come would have the money to go on with the sewers, while if it was defeated the council would have to go to the ratepayers and ask them if they favor the local improvement system. He was in favor of the latter system, but there were financial reasons why it would be better to do the work under the general loan system. It would take a whole staff of bookkeepers to keep track of the numerous accounts that would have to be opened. If the by-law was passed sewerage work would go on for three years to come, while if it was defeated no work would be done either this or next year.

Senator Macdonald was sure that both systems of building the sewers could not be carried on at the same time. The only way to do the work was by one general system. The cost under the local improvement system would be very great and the complications would be so numerous that they could not be unravelled. He would advise the ratepayers to carry on all big works by the general system. The council this year asked for $399,000, and out of that there was only $20,000 for streets and improvements. Last year the ratepayers refused to sanction a loan for a small-pox hospital, and now the council proposed to spend $16,000 for a hospital that the ratepayers said they did not want. This was breaking faith with the ratepayers. When the revenue was less than $100,000 there was more done on the streets. At present the streets could not be repaired or watered, and in the face of this the council proposed to spend $300,000 for opening a street, while they could not take care of those streets that they have already. The council should have put their heads together before passing by-laws. Members of the council had hobbies and they brought forward by-laws to borrow large amounts. There was another small matter, viz., the increase in the aldermen's wages. Of course if they wanted to take it they could; perhaps they deserved it.

Ald. McKillican said Senator Macdonald evidently did not understand why the council proposed to widen View street. The Government opened a street through the school reserve from Yates to Fort street with the understanding that the city should widen View street. The agreement was in writing and if it was not carried out the Government would have forced the city to do it. In regard to the electric light by-law he would like to say something. The city, as was well known, was very poorly lighted. The chief object of the by-law was to put in a new plant to keep the present lamps lighted and to provide light for new lamps in the outskirts of the city. The city hall, fire halls and market would be lighted by the city's plant, saving several thousand dollars for the ratepayers. The amount asked would give a good system of electric lighting and the cost of maintaining the city would be decreased.

Mr. E. Mallandaine asked if the city could not be lighted for less by contract.

Ald. McKillican said it would cost a great deal more, and, in his opinion, it was far better for the city to have its own system. If a company did the work by contract they would of course expect to make a profit.

Ald. Bragg was surprised at the remarks of Senator Macdonald. He was sure that any member of the council, including the mayor, would be glad to change places with the senator. (Laughter.) During the recent campaign a great deal of dissatisfaction had been expressed at the condition of the schools as to size and sanitary conditions. As a candidate for alderman he promised to do his best to remedy these evils. The amount asked for was to provide for the erection of two graded schools, one in north ward and one in the south ward.

Ald. McTavish explained his object in introducing the by-law for improving Beacon Hill park. The original by-law that he had introduced had been materially changed by the council, who thought it was too plain. His primary object was to improve the condition of the working men by establishing a relief work, where men who were in need of work could be sent for a day or two. It could not be said that the park had not been improved by the $25,000 borrowed some years ago. There was but $500 appropriated for the maintenance of the park this year, and there was but one man to do the work. Here was a park of 300 acres to be kept in good condition by one man, with $500. Senator Macdonald had impeached the council for wanting to build an emergency hospital. If that hospital had been built two years ago what would have been saved by the city. The city would have been saved several times the cost of a hospital. (Applause.)

Ald. Miller hoped that the school and park by-laws would be passed. He explained his object for voting for the increase in the figures of the sewerage by-law and why he opposed it as it stood. The people of the outlying district, he said, either wanted to do all the work under the local improvement by-law or have that by-law repealed altogether. He also opposed the electric light by-law. He claimed that by purchasing the tramway company the city would save $12,000 a year by electric light only. Besides this the city would have the tramway and the obnoxious charter against which all were complaining would be obliterated. If the ratepayers decided to borrow the $865,000 it would cost just $1,476,879. (Applause.)

Ald. Baker said that he had fought the sewer by-law because he was of opinion that the local improvement system should be applied to sewers. Rudolph Herring stated that his system would cost only four hundred thousand dollars, but already three hundred thousand dollars had been spent and not more than one or two of the main streets had been sewered. He claimed that the sewerage engineer did not understand his business. He hoped that the by-law would be defeated, as the work should be done under the local improvement by-law. People should pay for what they received. He was in favor of the school by-law and he was sure that a majority of ratepayers are in favor of it. If the present electric light plant was properly looked after the city could be better lighted. It would be a good plan to call for tenders for lighting those portions of the city in which there are at present no lights. (Applause.)

Mr. C. E. Redfern claimed to be father of the sewerage system. It was during his administration that the first sum was appropriated to take levels, etc., with the view of constructing sewers. He had seen the question drag along and at last a start had been made. That start having been made the work should be continued. He felt inclined to favor the local improvement system, but he thought that the main sewers should be paid for by the corporation, while the property owners should pay for the lateral sewers. For instance, an eight-inch pipe might be sufficient to sewer Government street, but it might be necessary to run an eighteen-inch pipe through Government street to carry off sewage from other parts of the city. It would not be fair to charge the Government street property owners for an eighteen-inch pipe when they only needed an eight-inch pipe. But he thought it incumbent upon him to vote for the by-law on Thursday, as it was necessary to have sewers. He also favored the educational and electric light by-laws. The ratepayers should not be afraid of increasing their taxes a little to improve the city. He for one was glad to see that the council had appropriated a sum for a smallpox hospital. (Applause.)

Senator Macdonald moved, seconded by Sheriff McMillan, "That the ratepayers of the city of Victoria recommend and approve that the city be sewered at the cost of the general revenue of the city."

The motion was defeated by a vote of 17 to 16, very few voting.

After a vote of thanks had been tendered the chairman the meeting adjourned.

THE INFANT'S BUILDER.

Magnificent Results!

Grateful and loving mothers all over Canada consider it a duty to say something in favor of a food that has proved a source of life and strength to their babies. A lady writes from a town in New Brunswick as follows: "When my baby was born last year it weighed only four pounds and a half, and did not increase much in weight up to its second month. I was advised to use Lactated Food by a friend, and I am happy to say it worked wonders. My girl continued to grow and increase in weight, and now she is almost 16 months old and weighs 25 pounds. She was not sick an hour during the hot weather last summer; I am sure the Lactated Food was her great preserver. I wish every mother knew of the good qualities of this infant's food."

Mothers who have puny and delicate infants should lose no time in procuring a supply of Lactated Food. Be careful you get the "Lactated," as no other prepared food can give the same good results.

COAL

The New Vancouver Coal Mining & Land Co., Ltd.
(FORMERLY THE VANCOUVER COAL CO.)
ARE THE LARGEST COAL PRODUCERS ON THE PACIFIC COAST.

THE NANAIMO COAL (Used Principally for Gas and Domestic Purposes.) | THE SOUTH FIELD COAL (Steam Fuel.)

THE NEW WELLINGTON COAL
House and Steam Coal, are mined by this Company only.

The "NANAIMO" COAL gives a large percentage of Gas, high Illuminating power unequalled by any other bituminous Gas Coal in the world, and a superior quality of Coke.

The "SOUTH FIELD" COAL is now used by all the leading Steamship Lines on the Pacific.

The "NEW WELLINGTON" COAL, which was introduced early in the present year, has already become a favorite, especially for domestic purposes. It is a clean, hard coal; makes a bright and cheerful fire, and its lasting qualities make it the most economical fuel in the market.

The several Mines of the Company are connected with their Wharves at Nanaimo and Departure Bay, where ships of the largest tonnage are loaded at all states of the tide. Special dispatch is given to Mail and Ocean Steamers.

THEY PAID DUTY.

The Crew of the Xora Were Taxed for Their Silver Trophy.

The Xora, G. V. Johnson's new sloop, returned Saturday night from Victoria, says the Seattle Post Intelligencer, where she was entered in the yacht races. The crew are all elated over the Oak Bay trophy which they won. It is a beautiful silver cup, of fine workmanship and appropriate design. They also speak in the highest terms of the treatment that they received at the hands of the Victoria yachtsmen.

There is one incident of the cruise, however, that is a touchy point to the young tars. On the return trip they anchored off Port Townsend and were boarded by a customs officer, a self-important deputy. He inquired if there was any more cargo than when they were outward bound, and received a negative answer. But one of the crew, flushed with success, could not refrain from saying the only new thing they had aboard was the silver cup they had won. Instantly the officer's keen sense of duty was aroused and he insisted on duty being paid on the trophy. In vain the yachtsmen protested that the cup had been use on the other side and had been baptized in British beer. The stern guardian of Uncle Sam's interests could not be moved. As fortune would have it the Xora's crew had enjoyed themselves so thoroughly in Victoria that their purses were so depleted that there was not enough among them to pay the damages of the customs officer. It was not until one of them had gone ashore and made a draft on his banker at Seattle that the Xora was permitted to weigh anchor and sail for Seattle.

LIGHT WANTED.

To the Editor: The answer of Ald. McKillican to Mr. W. C. Ward at the public meeting respecting the electric lighting was very unsatisfactory. It is believed the cost of lighting the city is far in excess of what a better service could be supplied by private parties. At any rate it was the duty of Mr. McKillican to have ascertained what the lights would have cost from private companies before asking the ratepayers to throw another $75,000 into the bottomless pit at the Yates street station.

It was stated on the street to-day that the tramway company are ready to supply double the lights now used at less than the present cost.

It would be well for the ratepayers to pause before voting for Ald. McKillican's by-law to-day until the required information as to cost shall have been furnished.

CITIZEN.

Powder Works Wharf.

Messrs. R. P. Rithet & Co. have applied to the Dominion government for permission to erect a wharf at Telegraph Bay. This is where the new powder works are being erected and it is for the purpose of shipping powder that the wharf is required.

The Haytien Republic Seized.

The steamer Haytien Republic has been seized at Seattle on a charge of violation of the customs laws. The offenses alleged against her were committed when she was running on the Merchants' Steamship line. The Post-Intelligencer says of the seizure:—"The customs authorities have nothing to say further than that if the ship had not had an ounce of contraband goods on her on this trip and had not brought a single Chinaman to this side on this voyage they would still have enough evidence to confiscate her and to cause a number of persons considerable trouble. In short, the customs officers think they have bagged the big smuggling ring which is said to have its head in Portland and to have taken tons of opium and hundreds of contraband Chinese into Portland from Victoria and Vancouver during the past nine or ten months. Edwin O. Wood, of Detroit, a special agent of the treasury department, is managing the seizure. He came unheralded, and, it is said, surprised even the local authorities who are now working with him. He is a new man to the service, and, if all the stories are true, has a big job cut out for him in the present case. It is said that he has a vast amount of evidence collected by local customs authorities and sent by them to the treasury department." The evidence is understood to consist principally of correspondence between Major John Wilson, agent of the steamship company in Victoria, and the officers of the company at Portland.

An Engineer's Bravery.

The Anaconda Standard sings the praises of Engineer Clemerson. While climbing the Butte hill, the other day, with a lightly-loaded train of railroad cars, a heavily-loaded ore train just in front of him parted. The last ten cars immediately started down the steep grade backwards towards Clemerson's engine. Clemerson at once reversed his engine and started down the hill, keeping as slow a motion as possible, until the flying cars were upon him. He then quickened his speed to almost equal that of the approaching cars. They gradually approached until only 50 feet separated them. The fireman then threw the brakes on Clemerson's train, and in a second the cars struck the engine. The jar was sharp, but as the engine was reversed no material damage was done. So soon as Clemerson saw he had the cars against his engine he gradually lessened the speed of the whole, until he brought both trains to the foot of the hill in safety. Practically no damage was done, but had not the speed of the runaway cars been accurately gauged, Clemerson's entire train would probably have been smashed into splinters. The brakeman on the runaway cars had given up all hope, and sat down to await what would happen. He did not jump because the speed was too great. When safety was assured at the bottom of the hill, he went to Clemerson to thank him for his life. The latter looked at him and, according to the Standard, coolly remarked:—"That's all right, my boy. An engineer must always know his duty."

Castoria is a truly marvelous thing for children. Doctors prescribe it, medical journals recommend it and more than a million mothers are using it in place of Paregoric, Bateman's Drops, so-called soothing syrups and other narcotic and stupefying remedies. Castoria is the quickest thing to regulate the stomach and bowels and give healthy sleep, the world has ever seen. It is pleasant to the taste and absolutely harmless. It relieves constipation, quiets pain, cures diarrhœa and wind colic, allays feverishness, destroys worms, and prevents convulsions, soothes the child and gives it refreshing and natural sleep. Castoria is the children's panacea—the mother's friend.

Castoria is put up in one-size bottles only. It is not sold in bulk. Don't allow anyone to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose."

See that you get C-A-S-T-O-R-I-A.

The fac-simile signature of Chas. H. Fletcher is on every wrapper.

Drink California wines, they are purer than all others. California Wine Company, Limited, Nos. 55 and 57 Broad street.

SHORT LOCALS.

Gleanings of City and Provincial News in a Condensed Form.

—The members of Mrs. Florence's company left this morning for Nanaimo.

—The June session of the County Court will open to-morrow with a light docket.

—Joseph C. Blyth, formerly a resident of Victoria, recently disappeared from Seattle. He cannot be found.

—The Sons of Erin have a committee at work arranging for the coming picnic. The committee met yesterday. The date of the picnic and place have not been decided.

—There is talk of organising a Pythian sisterhood in connection with the local Knights of Pythias. Westminster has such an association.

this evening at 8 p.m. and as some changes of officers are to be made a very lively and social evening is expected. All candidates that have paid their proposition fee are requested to attend.

—The case of William Alexander, charged by John Knox with cutting harness belonging to him, was heard in the provincial police court this afternoon. Magistrate Macrae dismissed the case.

—The city council will hold a special meeting to-morrow (Thursday) afternoon at 4 o'clock to give the by-laws that have long been tabled a "hoist." The council will also meet on Friday evening.

—Ald. Styles after adjournment of the special meeting of the city council held this morning called attention to the leaky condition of the council chamber roof. He did not know whose business it was to attend to this, but would like immediate action taken.

—Inspector F. S. Roper has been up the line to Cowichan, looking after contagious diseases among animals. A glandered horse was found at Nanaimo last week by Mr. Roper and destroyed. Otherwise the domestic animals were found in a very healthy condition.

—Miss Johnson of Toronto, who has been appointed by the Presbyterian Foreign Mission Committee matron of their home at the Indian mission, Alberni, is at present in the city on her way to her destination, and is the guest of Dr. and Mrs. Campbell, at 74 Cook street.

—Mr. W. Cullin, the Victoria Typographical Union's delegate to the international meeting to be held at Chicago next month, has found it impossible to go on account of ill health. His son, Mr. W. H. Cullin, the alternate delegate, will therefore take his place. He will leave next week.

—Alfred Miller pleaded guilty to fast driving over James Bay bridge. Benjamin Deacon was charged with a similar offense. He also pleaded guilty. Magistrate Macrae fined them $2.50 each. He stated that the usual fine was $5, but he made allowance for them being kept waiting till noon.

—Bishop Perrin and Miss Perrin will meet the congregation of St. Luke's church, Cedar Hill, to-morrow. Bishop Perrin will be presented with an address of welcome by the congregation. The services will commence at 3 in the afternoon. The Ladies' Guild will hold a reception in the school house.

—In the police court William Shaw, drunk, did not appear. His bail of $10 was estreated. Susan, Songhees Indian, was fined $25 for being in possession of a bottle of Hollands gin. Jennie Chickens pleaded guilty to having a bottle of rye whiskey in her pocket. She said that a man on Store street gave her the liquor. The court convicted her and deferred sentence till to-morrow. The man who gave the whiskey was ordered to be taken into custody.

PERSONAL.

Visitors and Passengers to and From the City and Province.

D. Oppenheimer is down from Vancouver.

R. P. Rithet returned from the Mainland yesterday.

T. Snider of Tucson, Arizona, is at the Hotel Victoria.

N. L. Robinson and J. O. Brown of Seattle are in the city.

Sir M. B. Begbie returned from the Mainland last evening.

Thos. Tompkins and wife of Brockville, Ont., are at the Driard.

A. J. McColl and W. Forin of New Westminster are at the Driard.

Robert Kerr, general freight agent of the C.P.R., is registered at the Driard.

E.W. Shaw of Duncan's and M. L. Shaw of England are guests at the Hotel Victoria.

Samuel Briggs of Hamilton, Ont., and A. N. Briggs of London, Eng., are here on a visit.

William McKeon, sr., is able to be around again, and is kept busy shaking hands with old friends.

Rev. Jos. Hall, new pastor of the Centennial Methodist church, arrived from the Mainland yesterday.

Miss Helen Bishop of Montreal arrived from the east last evening on a visit to her sister, Mrs. A. E. Macnaughton of this city.

E. B. Carmichael, Mrs. Carmichael, Miss Carmichael and E. D. Carmichael will leave for the east next week. Mr. Carmichael will go to Montreal on business, while Mrs., Miss, and Mr. E. D. Carmichael will visit Chicago.

SPORTING INTELLIGENCE.

THE WHEEL.

CYCLISTS AT THE FAIR.

Chicago, May 31.—This is Wheelmen's Day at the World's Fair, and the devotees of the cycle began to turn out at an early hour. It is expected that fully 20,000 wheelmen will pass the gates during the day, the riders being of both sexes and from many parts of the country. This afternoon there will be a parade over the principal avenues of the Fair grounds.

THE TURF.

ISINGLASS WINS THE DERBY.

London, May 31.—The Derby was won by McCalmont's bay colt Isinglass; Ravensbury second; Raeburn third.

London, May 31.—Isinglass is a bay colt by Isonomy, out of Deadlock, and won the Two Thousand Guineas at Newmarket this month. Mr. Rose's colt Ravensbury is by Isonomy, out of Penitent, and the Duke of Portland's bay colt Raeburn by St. Simon out of Mower. Eleven horses started.

New York, May 31.—The dispatch announcing that Isinglass had won the Derby reached the United Press office in this city before the third horse had passed the finishing post. The dispatch came by the Western Union Company's cable, and was received at 22 minutes 45 seconds past 10 o'clock.

MEUNIER'S CHALLENGE TAKEN UP.

J. Meunier's challenge to match Dart against any horse on the Victoria track, bar Maud C. and Belle Watts, has been accepted by J. H. Brown, owner of Mollie Cooper, who will match that horse against Dart; $250 has been deposited with W. S. Chambers to bind the match. A further $500 will be deposited by each owner on June 7, and the remaining $250 will be deposited the date of the race, which is set for June 16.

METROPOLITAN HANDICAP.

Morey's Park, New York, May 31.—The Metropolitan Handicap was run to-day. Charade won; His Highness second; Blume third. Time, 1:52 1-4.

THE RING.

THEY FOUGHT A DRAW.

Philadelphia, May 31.—Johnny Van Heest and the Australian, Billy Murphy, met at the Wilton circus last night in a four-round bout. Out of respect to the law, no decision was rendered, but if there had been, it would have been called a draw. No perceptible damage was done to either.

MITCHELL KNOCKS OUT HALL.

London, May 31.—A vicious quarrel took place on Monday night on the sidewalk in front of a small tavern in Piccadilly, between Charley Mitchell and Jim Hall, the pugilists. Hall was very much under the influence of liquor and this circumstance probably encouraged Mitchell to assault him. After some words, and while Hall was endeavoring to get into a cab, Mitchell struck him in the stomach. Hall fell groaning to the sidewalk, cutting open his head. When the police arrived Mitchell had made his escape, and has not yet been arrested. Hall was arrested and taken to Vine street police station.

ATHLETIC.

GETTING INTO CONDITION.

Quite a number of athletes in the city are beginning to train for the out-door tournament of the James Bay Association on June 24th. The hill is a favorite spot for them, but many others find the roads in the suburbs quite good enough. There is no doubt that the various events will be keenly contested by large numbers of competitors. The sports committee promises to have the track at the Driving Park in first-class order by the 24th, so that there will be nothing in the way of the participants in the sports breaking records if they so desire. The affair is beginning to attract notice among amateur athletes on the Sound.

LACROSSE.

SATURDAY'S MATCH.

The great event of this week will be the lacrosse match next Saturday afternoon between Vancouver and Victoria on the Caledonia grounds. Vancouver is going to bring a strong team, while the home team will be strengthened by the addition of Ketchum and Macnaughton. It will doubtless be one of the hardest fought battles of the season. Practice will take place every evening this week. In yesterday's list of the probable players C. Cullin's name was omitted by mistake.

DIED.

HILL—On May 29th, at "The Vicarage," St. Martin-in-the-Fields, Charing Cross, London, England, Mabel Mary, the beloved wife of Edwin Howard Hill, of Victoria, B.C., and eldest daughter of the Rev. John F. Kitto, in her 26th year.

NAKUSP & SLOCAN MINES

The Eldorado of British Columbia

All the ore output now assured to Nakusp by the immediate construction of the NAKUSP & SLOCAN RAILWAY, which will start at Nakusp and end at the Forks of Carpenter Creek, directly in the centre of the Slocan Mines.

No Other Route can Possibly Compete

Thirty-five miles of Railway from Nakusp will tap the whole of the Mines of the Slocan District, and the ores are bound to come out BY THE NATURAL GATEWAY, VIA NAKUSP, to the general welfare and prosperity of the Province.

Look at the Map.

A Provincial Railway Charter and subsidy and a Dominion Railway Charter have been obtained for the Nakusp & Slocan Railway, and the Canadian Pacific Co. have entered into an agreement to lease and operate the Railway for 25 years. There can be no doubt as to the importance of NAKUSP, the Gateway of the Slocan Country, either from the North or South, and the principal shipping and distributing point for all the district tributary to Slocan Lake.

Concentrators and Samplers

Now in contemplation, consequent on the definite settlement of the Railway question. The Nakusp & Slocan Railway will be built with a rush right into the heart of the Mines. See Wardner's and other experts' estimates of the production of Slocan Mines in the press. All this now assured is directly tributary to the Nakusp & Slocan Railway.
